Crash and panel calculation

- **Exact game developer:** The main crash passport — Aviator, Spribe; the comparison includes seven different crash products, each with its own studio.
- **Betting window:** The acceptance window is 8 from JV-CR-01, closed before the flight starts; bets after the window closes are not accepted.
- **Number of panels:** Two panels of one flight; the crash outcome is shared, the panels are not independent flights.
- **First panel bet:** 10 FUN in the first panel, auto-cashout 1,80×.
- **Second panel bet:** 5 FUN in the second panel, manual exit 2,40× before crash 2,75×.
- **Manual cashout:** I took the manual payout of the second panel at 2,40×; if late after crash, the payout of this panel would have been 0 FUN.
- **Auto-cashout:** The first panel closed at 1,80× and credited 18 FUN; the second — 12 FUN.
- **Auto-bet:** Auto-bet is off at JV-CR-01; the next flight does not create a bet without separate acceptance.
- **Connection loss:** A connection loss does not cancel an already accepted bet; an accepted server-side auto-cashout applies per the round rule, a manual command requires confirmation.
- **Round number:** JV-CR-01-R01 — local ID of the flight with shared crash 2,75×.
- **Total payout:** 10×1,80 + 5×2,40 = 30 FUN in total payouts.
- **Net result:** 30 − (10+5) = +15 FUN; starting balance 1 000 FUN, final 1 015 FUN.
- **Result verification mechanism:** The result is checked against the round history and the provably fair verification function of the specific client; the local ID does not represent cryptographic proof.
- **Verification inputs:** Reproducing the verification requires the revealed server seed, client seed and nonce of the relevant round; an arbitrary string is not assigned as any of these values.
- **Multiplier rounding:** The accepted multipliers 1,80× and 2,40× are kept to two decimal places; the payout is rounded to 0,01 FUN after multiplication, not before it.

Crash: seven standalone products

For each row I analyzed a separate FUN flight and recorded the accepted multipliers. Autobets are not included; a manual exit after the crash gives 0. The main JV-CR-01 uses two panels of the same Aviator flight and a shared outcome of 2,75×.

Game / studio	ID	Panels / window	Min–max bets	RTP of the profile	First panel calculation	Net total	Limitation
Aviator / Spribe	JV-G-009	2; 8 from	0,5–1000 PLN	97%	10 FUN×1,8=18 FUN	+8 FUN; JV-CR-01	0% casino bonus; VIP by exclusions

JetX / SmartSoft	JV-G-010	2; 8 from	0,5–1000 PLN	96,3%	10 FUN×1,6=16 FUN	+6 FUN; JV-CR-03	0% casino bonus; VIP by exclusions

Game / studio	ID	Panels / window	Min–max bets	RTP of the profile	First panel calculation	Net total	Limitation

Pilot / Gamzix	JV-G-012	2; 8 from	0,5–1000 PLN	94,8%	10 FUN×1,7=17 FUN	+7 FUN; JV-CR-05	0% casino bonus; VIP by exclusions
Zeppelin / BGaming	JV-G-013	1; 8 from	0,5–1000 PLN	94,7%	10 FUN×1,55=15,5 FUN	+5,5 FUN; JV-CR-06	0% casino bonus; VIP by exclusions

In Aviator, the second panel separately yielded 5×2,40=12 FUN; the full total of the shared flight: bets 15 FUN, payouts 30 FUN, profit 15 FUN. The tabular first panel of 18 FUN is not added to the full 30 FUN a second time. Verification of the result uses the specific game's history and its provably fair inputs, without arbitrary seeds and TXIDs. For each additional crash card I opened a separate demo on Tecno, recorded the initial 1 000 FUN and after the round obtained 1 000−10+payout; after the reset, 1 000 FUN was restored.

Insta, special mechanics and jackpots

- Insta combines crash (a rising multiplier and the decision to exit, Aviator by Spribe and High Flyer), dice (the outcome of virtual dice), digital Scratch, Bingo, Keno, wheel of fortune and Plinko (a ball, obstacles and risk levels). The description names Spribe, Pragmatic Play, BGaming, Gamzix, Evoplay and Betsoft. Gamzix is mentioned together with bingo/keno, BGaming with dice/scratch cards, Evoplay with insta. Regular bingo — matching numbers on a ticket, keno — a draw of numbered balls. The bingo/keno description does not form a separate approved lottery showcase of the project.
- Megaways: a dynamic number of symbols and combinations on adjacent reels instead of a fixed line. The comparison describes classic 5–20 lines and the large number of Megaways combinations. Examples: Cleopatra's Gem Rockways (Mascot Gaming, 95,10%), Aztec Magic Megaways (BGaming, 96,69%), Book of Panda Megaways (96,95%, cascades, multipliers, Scatter, Wild, free spins, expanding symbols). A demo and changing promos are indicated.
- Buy Feature: purchasing a feature (usually free spins or a bonus round) for the price set by the provider. Examples: Zeus the Thunderer (Mascot Gaming, RTP 95,30%, high volatility, Greek theme and special symbols), Sweet Bonanza and Gates of Olympus (Pragmatic Play). In general, FAQ the operator cites a typical cost of 1–2 base bets and notes that payouts overall are usually no higher. For confirmed demos of individual games, different costs are visible (40× for Baba Yaga, 60× for the RESPIN option in Jewels of Ra, different Raptor modes). The overall figure cannot be transferred to every game.
- Jackpots: fixed with a constant reward, progressive from contributions and resetting to the starting amount after a win, network spanning several casinos. The Automaty guide gives historical examples of Mega Moolah (Microgaming) and Mega Fortune (NetEnt) with amounts up to tens of millions PLN converted. The maximum bet condition depends on the game; the general page states a random trigger or a special combination, standard cashier times and limits and longer verification of large payouts. Examples named include Burning Hell (Endorphina, holding), Coin Win: Hold The Spin (Gamzix, coin collection), Jackpot

Hunter (Pragmatic Play, levels), Blazing Crown Deluxe (Amigo Gaming, symbol holding), Jackpot Lab (Platipus, holding and pool growth), Fortune King Jackpot (Tada Gaming, network), Jungle Jackpots (Blueprint Gaming, levels), Diamond Raid (Amigo Gaming, tiger jackpot).

- JV Jackpot Hunt: an add-on to Penguin King is described, joining is voluntary, €0.20 on top of the regular bet for each participating round. An icon and a dynamic reward counter on the left in the game. The mini-game launches randomly, Mini 50×, Minor 100×, Major 500× and a progressive Grand fed by every activation. After a win the main pool resets, and the absence of a daily limit on the number of winners is stated. The add-on is active with real funds, the slots themselves are also available in demo. More than 100 games, more than €1 million in prizes in a single day and over 40 000 winners per day are stated. The structured counter of the separate category is 24, its coverage may differ. Examples: Caishen's Temple of Gold (Hold & Win), Buffalo Smash: Supercharged, Bass Smash, Hot Harvest, Bounty Smash, Zeus Smash, Gold Chain, 777 Hot Reels, Rune Raiders and Juicy Jewels Supercharged. Support for mobile browsers and the app is stated.
- Endorphina Money Fall / Endorphina Casino Drops: the page describes random prizes when playing at Endorphina with own or bonus funds and states a payout without waiting/extra procedures. The description offers all Endorphina games, in the saved category the counter is 20. Fortune Snake, Power Balls, Book of Santa Dice and Mr. Jingle Bells are named as new at the time of the text. In the table: Joker Stoker 96,00% (Hot Spot, free spins, Gamble, Wild, Scatter), Lucky Streak 1000 96,07% (sevens, special symbols, 4 jackpot, bonus game), Book Of Santa 96,00% (video, free spins, expanding symbols, Gamble, Scatter and Wild). The provider page JV gives 96,05% for Book of Santa.
- Spinoleague: a series of Spinomenal tournaments, points and ranking from playing participating slots. The general description states that no separate registration is required. A season of up to €12 million is stated, an example of 3 rounds and about €150 000 for the first 200 places, usually 7 days per round, up to €300 000 per round, cash prizes, bonuses/spins. These are overview examples, the specific promo page has its own dates, games and terms. Examples of games: Super Wild Fruit (Wild and multipliers), Majestic King (bonuses), Book Of Titans (spins, expanding symbols), Book Of Panther (Book feature), Book Of Rebirth (spins and multipliers).
- Drops & Wins: the overview text links the format to Pragmatic Play from 2020. It states daily random prizes regardless of the spin result, €35 000 daily and up to €2 500 per single reward, €255 000 and 10 000 cash prizes per week with a maximum of €25 000, €30 million per year. It indicates €0.50 simultaneously as a qualifying bet and as a "deposit", so the nature of this figure is ambiguous across the page. According to the overview text no separate registration is needed, FS and bonus funds are indicated as eligible, points depend on the ratio of win to bet. The annual and daily terms of the specific promotion and the provider's consent screen are stored separately. Examples: Gates of Olympus, Sweet Bonanza, Big Bass Splash, Big Bass Bonanza, Sugar Rush.
