Deposit

- **Checkout entry point:** I opened the balance → Deposit → USDT TRC20, entered 20 PLN and checked the network before JV-D01.
- **Method name in checkout:** USDT TRC20 for JV-D01; MiFinity Wallet for JV-D02.
- **Order amount:** JV-D01: order 20 PLN; sending 5,025126 USDT at a fixed quote of 3,98 PLN per 1 USDT.
- **Operation minimum:** 20 PLN for USDT TRC20; other approved minimums are not replaced by this figure.
- **Operation maximum:** 100 000 000 PLN — the upper value of the form configuration USDT TRC20, the saved checkout area. Amount JV-D01 — 20 PLN.
- **A new request is needed:** For the next deposit I created a new request and received the details again; I did not use the old QR.
- **Details type:** A one-time address TRC20 and a QR from the created request; the payment details of the author are not published in the reference.
- **Order validity:** 30 minutes to pay for order JV-D01; the transfer was sent within its validity period.
- **Destination identifier:** Local ID JV-D01; a separate memo/tag for route TRC20 was not used.
- **Owner name:** Funds were sent from the author's own instrument; the profile name matched the documents KYC.
- **Bank confirmation:** In JV-D01, the bank's 3-D Secure is not involved; for the card route, confirmation is performed in the bank's window.
- **Minimum incoming amount after deductions:** After rounding the checkout down to 0,01 PLN, 20,00 PLN was received; the external wallet fee was charged on top of the send amount.
- **Number of network confirmations:** 20 network confirmations in the JV-D01 passport; waiting for them is included in 230 of the full interval.
- **Status before transfer:** After creating JV-D01 I saw awaiting payment; balance before sending 0 PLN.
- **Status after transfer:** After JV-D01 was credited, the status is completed; cash balance 20 PLN.
- **Amount that appeared in the balance:** 20 PLN of funds; 20 PLN match was credited separately and is not named as part of the deposit.
- **Automatic bonus activation:** The first minimum deposit automatically activated the welcome and credited 100% match; entering a promo code was not required.
- **Resending on delay:** On a delay I checked the status of the created order and the wallet history; a resend is arranged as a new operation after ruling out a double payment.
- **ID top-up episodes:** JV-D01 — the first minimum deposit; JV-D02 — a separate repeat deposit 50 PLN via MiFinity.
- **Country of the deposit gaming account:** Poland for JV-D01 and JV-D02.
- **Country of the deposit payment account:** The author's personal wallet from Poland; the author's MiFinity with a Polish profile.
- **Deposit sending currency:** JV-D01 — USDT, network TRC20; JV-D02 — PLN.
- **Deposit crediting currency:** PLN in both operations; the rate was applied only in JV-D01.

- **Deposit sending time:** JV-D01: 11.11.2026 10:00:00+01:00; JV-D02: 12.11.2026 10:12:00+01:00.
- **Deposit crediting time:** JV-D01: 11.11.2026 10:03:50+01:00; JV-D02: 12.11.2026 10:14:40+01:00.

Crypto payment and internal transfer

- **Asset:** USDT in JV-D01; TRX is a separate network asset and is not renamed to USDT.
- **Network:** TRC20, blockchain TRON. ERC20 and BEP20 were not used in JV-D01.
- **Movement method:** An external blockchain transfer from a personal wallet to the checkout order address, then the equivalent is reflected in PLN.
- **Address or Pay ID:** The address was obtained inside JV-D01 and verified against the QR; instead of the full public address, the reference uses a local link to the episode.
- **Memo/tag required:** A separate memo/tag for JV-D01 was not required; the order identifier was not entered as a memo.
- **Network support by recipient:** I selected TRC20 both on the sending side and in the checkout; the name USDT alone does not specify the network.
- **Number of confirmations:** 20 confirmations in route JV-D01; the wait is counted within the total crediting time 230 s.
- **Time of sending to the network:** 11.11.2026 10:00:00+01:00; the casino's crediting record — 10:03:50+01:00.
- **TXID:** The public TXID is the detail of a specific network record. For the coherence of this reference, JV-D01 is used, without a line imitating an external TXID.
- **Internal transfer identifier:** JV-D01 — a local episode identifier. Internal P2P between players is not part of the money route; address transfers to players are not mixed with checkout deposits.
- **Amount after network fee:** 5,025126 USDT was sent to the recipient; 5,775126 USDT was debited from the wallet together with a service fee of 0,75 USDT on top.
- **Status at the operator:** JV-D01 completed, gaming cash balance 20 PLN.
- **Payment transfer status:** The wallet transfer is completed; the service fee was not deducted again by the casino.
- **Refund for unsupported network:** A wrong network is not considered a successful deposit; recovery is handled through support with the details of the actual transfer, without a promise of automatic refund.
- **Confirmation on deposit:** JV-D01 confirmed in the personal wallet; JV-D02 — in MiFinity. Payment confirmation by its service is separated from the casino's SMS for JV-W01.
- **Documents on first deposit:** For JV-D01 and JV-D02 the casino did not request additional documents; the right to subsequent verification is reserved.

JV-D01: minimum deposit and wallet cost

I created PLN order USDT TRC20 11.11.2026 at 09:59:30+01:00, checked the network and sent the payment in 10:00:00. In 10:03:50 the checkout credited 20,00 PLN.

Parameter	Value
Order quote	3,98 PLN per 1 USDT; fixed at order creation, this is the rate of a specific episode
Sending to recipient	5,025126 USDT; rounding the required send amount up to 0,000001 USDT
Conversion	5,025126×3,98=20,00000148 PLN
Crediting	Rounding down to 0,01 PLN → 20,00 PLN
Wallet fee	0,75 USDT on top of the send amount; this is the wallet's service tariff, not the size of TRON gas
Full wallet spend	5,775126 USDT
Casino commission	0 PLN; the network fee is not deducted again from the PLN balance
Network / confirmations	TRC20 / 20 confirmations in the route passport
Duration	230 s = 3 min 50 s, from sending to crediting
Bonus total	10:03:51+01:00, automatic match 20 PLN and entitlement to 100 FS; total balance up to FS 40 PLN

Deposit options and limits

- **OPERATOR-CONFIRMED, Polish homepage.** JV Casino states support for PLN without additional conversion costs for local transactions and three groups of payment methods: credit and debit cards, e-wallets and cryptocurrencies. SSL and FS AntiFraud Tool are mentioned as protection measures. These are general statements, and the availability of a method is determined by the specific operation, currency and checkout state.
- **OPERATOR-CONFIRMED, English-language public page.** The minimum deposit 10 EUR and popular methods WebPay, Bitcoin, Tether, Binance Pay, Litecoin, TON and Dogecoin are indicated. The available set in the cashier depends on the region. The minimum 10 EUR refers to the public description; the observed cashier was in PLN.
- **authorized checkout PLN, 15.11.2026.** In three saved checkout provider responses, the same set of eleven available deposit methods. The checkout interface in Polish showed "Wszystkie metody" and "min: 50 PLN". The individual minimums of different methods are taken from the form settings and listed in the table. For MiFinity Wallet, the snapshot of the second step of the form shows a minimum of 50 PLN, a quick selection of 50/200/500/1 000 PLN and manually entered 100 PLN in the field and in the summary block before "Kontynuuj". Two "Krypto" card pages visually confirm the currencies and their minimums from the table.
- The internal top-up system is registered in the platform as a technical router to the cashier. Its zero internal minimum, conditional maximum threshold and zero internal commission are not a tariff for the customer. The cashier was opened separately from the lobby, tournaments and the "Wheel of Fortune". This is the state of the source account before its own operations; JV-D01/JV-D02 have a separate author's log. The payment history showed "Brak płatności".

Top-up method	Category	Min., PLN	Max., PLN from the cashier settings
MiFinity Wallet	Wallets	50	416 300
Ethereum	Cryptocurrencies	50	100 000 000
Dogecoin	Cryptocurrencies	25	100 000 000
BNB, BEP20	Cryptocurrencies	25	100 000 000

Top-up method	Category	Min., PLN	Max., PLN from the cashier settings
USDT, TRC20	Cryptocurrencies	20	100 000 000
USDT, ERC20	Cryptocurrencies	50	100 000 000
Litecoin	Cryptocurrencies	25	100 000 000
Bitcoin	Cryptocurrencies	40	450 000
USDC, ERC20	Cryptocurrencies	50	100 000 000
Gram (name on the card), TON network	Cryptocurrencies	25	100 000 000
TRON (TRX)	Cryptocurrencies	25	100 000 000

- **Applicability limits.** Maximums, including 100 000 000 PLN, belong to the form configuration; this is not an author's operation at the maximum amount. The fee, crediting time, network fee and final rate for each method are accounted for in the corresponding operations. Cards and other means from the operator's general materials were not in this cashier set. The author's PL routes and the full approved list for Poland are described separately from this cashier configuration.
- **attempt to open the withdrawal section.** A modal prompt "Proszę podać następujące szczegóły" with fields for selecting gender and phone number was preserved. There is no next working screen with methods and limits. When the payment history was opened independently, it displayed "Brak płatności". The terms of external withdrawal cannot be substituted with the top-up list. Internal P2P between players is not part of the route under consideration.
- **OPERATOR-CONFIRMED, rules for depositing funds.** To play or bet, you must top up your account with funds from a lawful source. Payments must be authorized. Funds are deposited from a bank account or card belonging to the player. The use of third-party funds and payment details when topping up or withdrawing is prohibited. Where a violation is established, the regulations provide for blocking and confiscation of winnings. Cash is not accepted. The terms of third-party electronic payment operators and banks apply unless they conflict with the regulations. In the event of a bank return to the lawful owner, the transfer fees are borne by the recipient. Where fraud is suspected, including a stolen card or chargeback, the operator may block the account, cancel withdrawals, recover winnings already paid out and refer the matter to the relevant authorities and debt collectors. The operator may also offset a positive balance against the player's debt, including after recalculating bets due to duplicate accounts, collusion, fraud, criminal activity or errors. Funds are held without interest accrual and without bank deposit insurance.
