Live casino and table rules

- **Table name:** Main table Speed VIP Blackjack A; roulette and baccarat rules are disclosed in separate lines and are not attributed to blackjack.
- **Provider:** Evolution for Blackjack VIP A; the comparative sample separates Evolution and Pragmatic Play Live.
- **Format:** Live video with a blackjack table, 7 seats; the given hand calculation is separated from the slot's money session.
- **Dealer language:** English at the selected table; the Polish casino navigation does not mean the dealer speaks Polish.
- **Schedule:** Round-the-clock access to the section; availability of a specific table is determined by the open shift and seat availability.
- **Available seats:** 7 seats; in the comparative opening, 2 free seats. The number of seats is not equal to the number of tables.
- **Bet Behind:** Bet Behind is allowed to observe the selected hand; side bets are calculated separately from the main hand.
- **Minimum bet:** 50 PLN for the main bet Speed VIP Blackjack A in the selected PLN profile.
- **Maximum bet:** 10 000 PLN for this table's main bet; side bet limits have their own ranges.
- **Blackjack payout:** Blackjack 3:2: with a bet of 50 PLN a full return of 125 PLN, net win 75 PLN; a regular win gives 100 PLN together with the bet.
- **Dealer rule:** The dealer stands on soft 17; insurance and natural blackjack have a separate calculation.
- **Double and split:** Doubling adds one more original bet; split creates two paid hands. For the calculation of 50 PLN, doubling requires another 50 PLN.
- **Roulette wheel type:** For European Roulette — 37 sectors 0–36, a single number pays 35:1 plus the return of the bet; the wheel does not relate to blackjack.
- **Commission in baccarat:** For regular Baccarat Banker, commission 5% on the net win: bet 100 PLN, payout 195 PLN, profit 95 PLN.
- **Special commission-free payout:** In Super 6 Baccarat Banker 6 pays 1:2 without commission: bet 100 PLN, full return 150 PLN; this is a separate table, not a change to regular Baccarat.
- **Additional bet:** Perfect Pairs and 21+3 in blackjack, Tie in baccarat and special game show sectors are not included in the base payout of the main bet.

Live: seven different games and calculation constraints

I opened the video stream and the rules of each game from the Polish catalog on both smartphones. This is observation of the video table and hand calculation; it does not create an additional monetary transaction JV-S01. Live has no FUN withdrawal, and the presence of guest viewing is not a demo game for real payout.

A single RTP for the entire table does not apply to a set of different side bets. For a European straight-up bet, the mathematical return is 36/37=97,2973%; the American wheel with 0/00 has a different base 36/38=94,7368%. The choice of blackjack strategy and the structure of side bets changes the expectation; the payout of a single winning hand is not an estimate of RTP. For no-commission Baccarat, a Banker result 6 is treated under the rule of a separate Super 6 version.

Live and table games

- Live is compared to RNG as a video table with a real dealer instead of a software interface. Chat with the dealer is possible, sometimes also with other players. Encryption, verified payment methods, registration, email confirmation, deposit and login to live as the path to playing for money are stated. Types: table roulette and card poker, blackjack, baccarat. Among Blackjack — Blackjack Salon Prive, Blackjack da Sorte, Limitless Blackjack, Rumba Blackjack, Gold Blackjack. Among live poker — Russian Poker, 6+ Poker, Bet on Poker. The operator claims availability on phones and support via chat and email.
- Roulette: the reference claims 70+ games and European, French and American variants both in RNG and live. The market counter in the same materials 135. Mini, VIP and Speed are also mentioned, as well as the possibility of a demo for a suitable version. The European variant has a single zero, in the French variant La Partage returns half of an even-money bet on zero, the American one has 00 and a stated house edge of 5,26%. Examples: European Roulette (Evoplay), VIP European Roulette (Betsoft), Speed Roulette (Pragmatic Play), French Roulette (Vivo Gaming), French Roulette Classic (Evoplay), American Roulette 3D (Evoplay), VIP American Roulette (Betsoft), American Roulette (Evolution). The page text states GCB for licensing.
- Blackjack: the opponent is the dealer. Start with 2 cards, of which the dealer has 1 visible. Card points by face value, picture cards 10, ace 1/11. The goal is to beat the dealer without exceeding 21. A first pair of ace + 10 or a picture card gives blackjack; in the text, the payout for a regular win is 1:1, blackjack 3:2. The possibility of taking a card, doubling with one card, split and insurance, depending on the variant, is stated. In live there is video and possible chat; in RNG the dealer is software. For the demo, virtual chips and playing as a guest are claimed; live demo is not claimed. The technical minimum of decks in the article is two, the usual number is 7–8, in some games the bet is from 5 PLN. The theses about the basic table, card counting and Martingale belong to the operator. Legal applicability is determined by territorial conditions and the legislation of the relevant jurisdiction.
- Baccarat: a separate Polish edition Baccarat. The live description notes automatic calculation and the player's role as choosing a bet on the card outcome. The rules of the selected table Baccarat A and of a separate Super 6 model are given in the live passport.
- Poker: video and live are described, including Texas Hold’em. Deuces Wild video poker allows deuces to substitute for other cards, including for five of a kind; the minimum for a payout is three of a kind. Deuces Wild MH is a multi-hand version. In Joker Poker MH the joker is Wild, the deuce is standard, the minimum payout is for a pair of kings or higher, and multiple hands are available. The reference cites a common video poker RTP of 98–99% without tying it to each specific version. The winning condition and payout depend on the variant and its paytable.

Live casino

Live casino in the JV Casino offer

And if you have never used this type of service before and do not know what a live casino is, today we also have a special guide for you explaining all the necessary issues. In it we will discuss everything that may interest you, that is, for example, the very concept of a typical live game, the role of video streaming, the tasks of dealers and other aspects. We invite you to read it, and we are sure that today you will visit our “live casino” section and play your first game of this kind!

How to start playing the live games available in JV Casino?

If you feel like playing the live games that the JV Casino online casino offers, then there is nothing simpler! Below we will describe what you should do to ensure you have the opportunity to take part in this exciting gameplay. Of course, this will be a general description covering all types of games in our offer, but you will certainly manage.

Start by preparing your computer or mobile phone (depending on which device you want to use to play the gambling games offered by our live online casino), and then follow the procedure below.

Create an account on our JV Casino site by clicking the "Register" button and filling in a simple registration form.

Browse the list of bonuses available with us in JV Casino and choose something for yourself, paying special attention to the welcome promotion for new users.

Choose a title that interests you from our range of offerings in the "Live casino" section and, after a few seconds needed for the game to load, you can immerse yourself in the very middle of the most exciting gambling gameplay you can engage in over the Internet!

Of course, before you start playing for all you are worth, it is worth spending a few moments learning the rules of a given game, especially if you have never played this type of title before. We mean that, for example, when choosing live blackjack, you should know well how to play blackjack, rather than learning on the fly during gameplay. If you have not dealt with blackjack before, then of course you can play any automatic version in demo mode (that is, for free) that you find in our offer.

Also remember to make sure that the range of available bet amounts for a given live game matches your expectations (it is neither too high nor too low). And do not forget that there is a real person on the other side – so you should follow the rules of courtesy and not insult the dealer in any way, nor allow yourself any inappropriate behavior.

The dealer's task is to run the gameplay in the game you have chosen and ensure you have a good time – but you should not raise topics in conversation with him (or her) that go beyond the game, nor expect that he or she will lead you by the hand through all aspects of gameplay. That is why it is worth learning the rules of a given live game in advance and then focusing on the gameplay itself, rather than on learning.

Of course, our live online casino offers only games from leading producers. All titles offered by our live online casino are licensed, approved for distribution on the Internet by the relevant gambling market regulators and have a full set of certificates confirming their fairness and correctness. And this, combined with the highest level of security in JV Casino, encryption of all connections and the use of only proven payment methods, means that, whatever else, with us you can play fully safely and sleep soundly!

Live Roulette

Roulette is probably the most famous and valued gambling game in the world, which means that in JV Casino live roulette awaits you in many different variants. Regardless of whether you prefer American, European or French roulette, you will find a whole host of options to choose from with us. And if you would like to play some less known variants, you will also find original and engaging live games based on roulette with us.

Live Baccarat

Baccarat is a real-money card game offered by our live casino, which owes its popularity, among other things, to films about the adventures of the famous agent 007, that is, James Bond. It is very simple and requires essentially no experience or knowledge, because everything happens automatically, and the player's role is simply to place a bet.

This does not change the fact that it is an exceptionally exciting game, and our live casino will let you play a wide range of various types of baccarat and numerous titles suited to different player tastes in JV Casino. If you have never played live games, in our opinion this is a great option for starting your adventure with this type of gameplay!

Collection of roulettes at JV Casino Poland: Available game options

The queen of casinos, namely roulette at JV Casino, has a very wide selection, that is, over dozens of titles covering various variants. We offer all the most popular varieties of this game, including French, European and American roulette, as well as many other innovative options. We regularly add new titles in this game to keep the gameplay fresh. If roulette is your favorite game, at JV Casino you will certainly find something for yourself – both in terms of online versions (RNG) and exciting live games, which are the foundation of our live casino.

European roulette

European roulette is the most classic and most popular variant of this entertainment. It stands out because on the European wheel we find only one green pocket with a single zero, thanks to which players have a greater chance of winning PLN than, for example, in American roulette. Visiting JV Casino, you will find various options for playing the European version, including:

- European Roulette by Evoplay;
- VIP European Roulette from Betsoft;
- Speed Roulette from Pragmatic Play.

French roulette

French roulette is very similar to the European version of the game. It is also a classic, much-liked variety of roulette. However, compared to the European version, it stands out for the availability of a unique rule called La Partage. According to this rule, if you place an 50:50 bet, for example black/red, and if the ball lands in the zero pocket, you don't lose everything, but recover half of the bet stake. This is a great variant when it comes to minimizing risk and the possibility of strategic play. JV Casino provides many French roulette games, including French Roulette from Vivo Gaming and French Roulette Classic from Evoplay.

American roulette

American roulette stands out from the other variants by one important element – the game wheel has an additional green pocket with a double zero (00). This pocket changes a lot. First, it increases the excitement during the game, posing an additional challenge, and second, it increases the final house edge, which is 5,26%. At JV Casino we offer various, fair versions of this dynamic game variant, including:

- American Roulette 3D from Evoplay;
- VIP American Roulette from Betsoft;
- American Roulette from Evolution.

Start your online roulette adventure at JV Casino today! Immerse yourself in our exciting game offer, where the best, high-quality, licensed and fully fair roulette games from the most distinguished developers such as Evoplay, Pragmatic Play or Evolution await you. Play various variants of this game, from French, through European, to American. In the online RNG version or live – however you prefer. Free online roulette is also available. Don't delay, register, make a deposit and spin the wheel at JV Casino right now and check whether today is your lucky day!

FAQ

Can I play online roulette for free?

Yes, at JV Casino free roulette is available in the demo version. This is a game mode in which you can play for free with virtual credits, so you can learn the basics of the game without risking money. Once you have mastered the rules in the demo game, you can move on to playing for real money!

What roulette variants are available at JV Casino?

Our offer includes all the basic roulette variants, including European, French and American roulette, all both in the RNG version and with live dealers. In addition, roulette is available in many different alternative versions, for example in the Mini, VIP or Speed version.

Is roulette at JV Casino safe?

Yes. First of all, we are a licensed, regulated online casino that meets all security and fairness standards. In addition, the online roulette games you will find at our casino are titles exclusively from licensed, certified developers. This makes playing roulette at the casino safe, and the results fair and independent.

Blackjack

Blackjack online at JV Casino

Probably every fan of card games, and especially of gambling, knows a game such as blackjack – or at least has heard of it. The Polish name of this game is "21" or "oczko", but despite the different name, its general rules are the same. The greatest strength of this game is its dynamic gameplay, simple rules, attractive payouts for winning a hand and, most importantly, numerous opportunities to apply effective strategies and methods of conduct during play.

Choose the blackjack simulator from our offer that suits you best and simply get going – because to win, you have to play!

How to play online blackjack?

Every blackjack available at our casino actually has identical rules. There may be some minor discrepancies introduced by the manufacturer of a particular online game, but they will not affect the gameplay itself. The general concept of the game is as follows:

Each card is assigned a specific number of points. To win, you will need to achieve a better result than the dealer, but without exceeding the value of 21. If you receive cards of a higher value, you automatically lose the hand, regardless of how many points the dealer achieves.

You can draw additional cards if you wish, one at a time – however, there is no obligation to do so, the decision is yours.

It is also worth focusing on the point values of individual cards, because that is exactly what every blackjack strategy is based on. Here the rules are also exceptionally uncomplicated – each card with a numerical value is scored according to its face value, that is, for example, a five will be worth five points, a ten ten, and so on. Face cards, on the other hand, are always worth 10 points. Aces deserve a separate mention – they are worth either 1 point or 11 points, depending on which option is more favorable for the player.

The titular "blackjack" is a hand consisting of an ace and a face card or ten – that is, having a value of 21 points. It means an automatic win in the round and the highest payout. And as for payouts, online blackjack offers the same payouts as the standard variety of this game, that is 1:1 for a standard win and 3:2 for a win.

Blackjack online versus live

On our JV Casino site you can play two different varieties of blackjack, namely the standard automated one and the live one. The general rules are identical in both cases, and the differences lie in the players' experience and the way the game is conducted. The table below contains the most important information on this subject:

Live	Online (automated)
You play with a real person sitting at a real table.	The role of the dealer is performed by a computer (program).
What cards you get is decided by pure chance.	The outcomes during the game are determined by a special algorithm referred to as RNG.
The gameplay footage is a video stream transmitted from the lobby	The game presents you with a generated image that has no real counterpart.
Interaction with the dealer is possible, and in some cases also with other players.	No possibility of interaction with other people.

Blackjack online for real money versus the demo version

The JV Casino online blackjack available at our site will not only let you play this amazing card game for real money. You will also find demo versions there that will let you familiarize yourself with all aspects of the gameplay completely for free. In the table below we present the biggest advantages and disadvantages of each option:

Field 1	Field 2	Field 3
Game version	Advantages	Disadvantages
For real money	This is the only way to experience the maximum excitement that accompanies online gameplay.	Every round requires staking real money.
It is the only way to win money in this game.		
You can also play live variants, with real dealers.	You must know the rules of the game to be able to steer its course appropriately in order to win.	
The basic blackjack strategy can let you win easily and quickly.		
Demo version	A popular way to get to know the game in practice.	There is no way to win any money this way. Blackjack online for free is based on virtual chips, not real currency.
You play for free and without any obligations.		
You do not pay a single cent, but you can play any number of rounds.		

Field 1	Field 2	Field 3
You can choose any version from the offer prepared by our online casino.	Live games are not available in the free version.	
You can play JV Casino at our site even without creating an account with us, as a guest.		
You can test various options, strategies and possibilities without risking the loss of money.		

How to win at blackjack?

Many players have certainly heard that there is such a thing as a basic blackjack strategy. But it is not the only available option for improving your effectiveness during gameplay. However, if you dream of winning at this game, then above all you must remember that to play for real money you will need an account with us at JV Casino and, of course, a deposit of funds to play.

And once you have that behind you, simply throw yourself into the whirlwind of blackjack, playing on instinct or supporting yourself with any strategy. We recommend the following to your attention above all:

Basic strategy – that is, a convenient-to-use table with suggestions for optimal moves for a given card layout.

Martingale – it consists of doubling the stake always after a loss.

Advantages of playing blackjack at JV Casino

Blackjack online is a wonderful gambling game, and the best place on the Internet to play it is undoubtedly our site JV Casino. We have plenty of variants of this wonderful game for you, both slots and live games. And for a good start you can find plenty of attractive bonuses at our site that will provide you with additional funds to play.

Of course, all our games are available in the Polish language version, you can play them in zlotys (PLN) and on your phone – you will not find better options anywhere for blackjack fans!

Is playing JV Casino safe?

Yes, of course. Our casino operates legally on the basis of a valid license, is safe, certified and simply absolutely fair!

Is online blackjack legal in Poland?

Yes, provided that you play it only at a legal casino, such as JV Casino.

How many cards are used to play blackjack?

Theoretically it can be played with as few as two decks, but usually online casino games use 7-8 decks.

The three best poker games in the JV casino offer

Description
🃏Deuces Wild
This title conceals online poker for free and for real money in the slot variant, that is, simply video poker. It is based on the most popular concept in this category of games, namely on standard poker hands enriched with an additional function for cards with the value "2". The popular twos here additionally have the Wild function, that is, they substitute for any other cards. Of course, this significantly facilitates obtaining payout-winning combinations, and at the same time also allows you to hit hands theoretically impossible to obtain, such as for example five identical cards. It is worth emphasizing that Deuces Wild is a game characterized by high payout multipliers, and the lowest combination allowing a win is three of a kind (three cards of equal value).

🃏Joker Poker MH

This is also online poker in the slot version. It has rules similar to the video poker described above, but with a few differences worth noting, as they significantly affect gameplay. First of all, the minimum win is available already for a single pair, as long as it is formed by two kings or stronger cards (lower ones are not rewarded with a prize). Secondly, the two is a standard card, and the role of Wild is played by the Joker. And thirdly, the game allows you to play several hands at once, not just one.

🃏Deuces Wild MH

This title has generally identical rules to the game of the same title described in the first point. The only difference is that this online poker allows you to play many hands at once, you do not have to focus on just one.

How to play online poker at JV Casino and win?

Our Polish casino website allows you to play many different variants of poker – so if you feel like starting your career as an internet poker player, you could not have come to a better place! Of course, as a guest you can only play free online poker, but when you want to play for real money, you can do so literally a minute later – because that is how long it takes to create an account at JV Casino and pay in funds in PLN to play!

And if you already have your account with us, then we invite you to start playing! Naturally, first choose the poker version that is best from your point of view. To start with, we suggest playing Deuces Wild or Joker Poker, as these are slot games with dynamic gameplay that will let you quickly master the basic aspects of gameplay, such as for example card hands and their strength. Live games with real dealers, such as Texas Holdem poker online and other productions available at our site, on the other hand, will work best once you have the poker basics down pat!

Of course, if you do not want to dive in at the deep end right away and prefer to calmly practice gameplay and gain experience without spending money, then numerous video pokers in the free version await you at our site. You can play them as much as you like, without any obligations, and scatter virtual chips in them to your heart's content!

Playing demo versions, that is, for free, also has numerous additional advantages. Well, in addition to getting to know the rules of the game, they will also let you test various kinds of strategies and methods of play. You will also become familiar with the payout tables, check which strategies work best in your case and which are better to give up. Take advantage of the possibilities that JV Casino offers you!

The best poker strategies

It has long been known that the best poker strategy is bluffing – which, however, cannot really be applied in video pokers or in live games. A bluff works only when playing with other players at one table.

But in video pokers the best way to win is to keep common sense. Do not expect that in every hand you will manage to hit a royal flush. Aim rather for lower hands, because they have the highest probability of being obtained. If, for example, you receive two queens, a six, a seven, an eight and a jack, then do not exchange the queens while hunting for a ten and a nine. Instead, keep both queens and exchange the remaining three cards – there is a greater chance of receiving, for example, a third queen or a second pair than of forming a poker from the original layout.

Frequently asked questions

What is the house edge in poker and how does it compare to other gambling games?

RTP in video pokers is usually very high, on the order of 98-99%.

Will the same strategy work in all poker variants?

Does the payout table matter for the amount of the payout?

Such a table contains multipliers, so on their basis it is easy to calculate the amount of the win for a given stake.
