Computer, web interface and synchronisation

- **Desktop client availability:** For JV-PC browser access is accepted; installing a separate Windows client is not part of the route.
- **Desktop access format:** I opened jv.casino in JV-PC browsers and logged into the same JV-ACC-PL-01. account
- **Client bitness and requirements:** Browser x64, Windows 11; the APK and iOS requirements do not apply to this access.
- **Window size:** Window 1440×900 CSS px; a separate responsive pass 1280×800 CSS px.
- **Browser zoom:** 100% in the main desktop series; 125% zoom was considered separately from its timing.
- **Menu display:** I opened the Sala gry, Zakłady, Promocje and Klub VIP menus; names and amounts did not overlap the buttons.
- **Game search:** I found Baba Yaga Tales by its full name and opened the Spinomenal card, keeping the studio attribution.
- **Number of actions to game:** Three actions from lobby to game frame: search, card, mode.
- **Number of actions to cashier:** Two actions to cashier: balance and Wpłata.
- **Horizontal scrolling:** At 1440×900 CSS px, horizontal page scrolling was not required; horizontal game carousels scrolled separately.
- **Amount readability:** I read the balance in PLN and confirmed the difference between cash and bonus funds before JV-S01.
- **Keyboard navigation:** Tab moved focus to the search and cashier buttons; game canvas elements used the provider's own controls.
- **Modal window behaviour:** The modal window closed with the X and Esc; I re-checked the entered amount before payment.
- **Login persistence:** After refreshing the tab the login persisted; after the logout command authorisation in this tab ended.
- **Balance on the second device:** After JV-D02 on iPhone I saw the same 70 PLN of cash funds as on the Tecno, before JV-S01.
- **Bet history on the second device:** After JV-S01 on iPhone the same 126 of rounds and final 402 PLN of payouts were displayed.
- **Bonus progress on the second device:** Before cancelling the welcome both environments showed 20 PLN match and 22 PLN of winnings FS; after cancelling the bonus balance became 0 PLN.
- **Logout on one device:** I performed a local logout on JV-PC; I ended the mobile session separately via the security settings.
- **Interface error:** When the width was changed to 1280 CSS px, the carousel kept its previous position; after resetting the filter, the full results returned. Monetary records did not change.

Installation, versions and app resources

- **Platform:** Android APK 1.3.6 and iOS Webview 5.37; mobile browsers are separate access methods.

- **Acquisition channel:** Android: the Android/"Zainstaluj aplikację" button on the operator's website; iOS: the Webview container from the mobile route in which JV Casino is open.
- **Publisher name:** Product JV Casino; legal operator Nixxe B.V. from the certificate. The app store account is not the licensee name.
- **App version:** Android APK ver.1.3.6; iOS Webview ver.5.37. Both apps are within the approved scope.
- **Build number:** JV-APK: build 130628; JV-IOS: build 53713. Versions and builds are stored separately.
- **Package identifier:** Local passport JV-APK-1.3.6, package identifier casino.jv.android; for iOS — JV-IOS-WV-5.37. The operation's local passport does not replace the publisher's signing credentials.
- **File size in bytes:** 7 490 000 bytes in decimal size units 7,49 MB.
- **File size in MB:** 7,49 MB — the approved size of APK 1.3.6. The illustration 19,16 MB refers to other saved material.
- **File size in MiB:** 7 490 000 ÷ 1 048 576 = 7,143021 MiB; the size is not summed with the size after installation.
- **Size after installation:** 24 MB of installed files JV-APK.
- **Data volume after the session:** 10,1 MB of user data and cache after a separate session; 34,1 MB occupied in total.
- **Minimum OS:** For the main Android route — 8.0+ (API 26); actual environment Android 15. The iOS container is open on iPhone with iOS 18.7.21; the advertising 12.0+ is saved as an area of the operator's page.
- **Architecture:** ARM64-v8a for JV-TECNO; arm64 for iPhone. Browser access is provided for Windows.
- **Checksum:** The checksum refers to a specific binary file. The reference includes the approved passport of size and build version.
- **Update:** I opened the JV-APK update screen and kept the current 1.3.6; logging in again left the game balance and history unchanged.
- **Requested permission:** INTERNET and ACCESS_NETWORK_STATE for network; POST_NOTIFICATIONS as an optional notification permission; the camera was requested only in the KYC scenario.
- **Action that triggers the request:** The notification request appeared when enabling push; the camera — after selecting document capture in the KYC section.
- **Behavior on denial:** I declined notifications: login, cashier and game launch remained available; when I declined the camera, I chose uploading a ready-made document image.
- **Push:** Push is provided in Android; I turned off marketing notifications separately from account service messages.
- **Biometric login:** After the first login I enabled biometric repeat access on the Tecno; on iPhone the container used Face confirmation ID. The password remained a backup method.
- **Offline behavior:** When the network was disconnected I saw no connection; a payment and a new bet were not confirmed without the server. After recovery, the server history determined the state.
- **Session traffic:** 58,5 MB over 17,5 minutes of mixed navigation and play; the download of APK itself is not included in this volume.

- **Battery consumption:** A drop of 3,8 percentage points over the same session; background downloads were turned off.
- **Heating:** Body temperature after the session 32,6 °C; start 28,6 °C, room 22,0 °C.
- **Container iOS WebView:** JV-IOS — iOS Webview 5.37; engine WKWebView/WebKit of the iOS 18.7.21 system. The web container is separate from the native game client and Safari.
- **Result of installing APK:** I granted installation permission to the browser that downloaded the file, installed APK 1.3.6 on the Tecno, and then disabled the unknown sources permission; login and game launch completed.
- **targetSDK:** targetSDK 35 in the JV-APK passport; the target API is separate from the minimum API 26.
- **compileSDK:** compileSDK 35 in the same passport; API of the actual OS — 35.
- **Required hardware features:** Touchscreen and network access are required; camera and biometrics are not required for the lobby and game.
- **Manifest flags:** For JV-APK, debuggable=false, usesCleartextTraffic=false, allowBackup=false were adopted; these parameters are not an external audit conclusion.
- **Actual permission request:** In JV-APK I received a system request for POST_NOTIFICATIONS when enabling notifications and CAMERA when photographing a document; I did not request geolocation to open the lobby.
- **Result of permission denial:** After denying POST_NOTIFICATIONS, the app retained login and cashier; after denying CAMERA, document upload via file selection is available.
- **Container app version WebView:** 5.37 — container app version, build 53713; no separate number of the installed WKWebView is assigned to it.
- **App Android:** Android APK is present in the approved scope: version 1.3.6, 7,49 MB; the mobile site is not an installation APK.
- **App iOS:** iOS Webview is available in the approved scope: version 5.37 on iPhone 16 Pro; a separate native IPA is not assigned to this access method.

Speed and stability

- **Measured action:** Separate series of cold lobby opening, repeat opening and game frame loading.
- **Interval start:** Cold open: tap on the icon after the process has finished; game: launch command from the ready lobby.
- **Interval end:** Lobby: search and balance are active; game: the start round button is available. The end of the logo animation alone is not readiness.
- **App state:** Cold series — the process was finished before the repeat; warm series — the process remained in memory.
- **Cache state:** In the cold series the file cache is preserved and the process is closed; the cleared storage state is not mixed with this mode.
- **Series network:** Wi-Fi 5 GHz, JV-TECNO; additional series iPhone and JV-PC have their own rows.
- **Number of launches:** Five successful repeats per environment/action pair; nine separate series in total.

- **First launch result:** JV-APK cold: 6.6 s from icon tap to active lobby.
- **Next launch result:** Second cold repeat JV-APK: 7.2 s; this is not a warm start.
- **Average:** Average JV-APK cold = 6,32 s, sum of five results ÷ 5.
- **Median:** Median JV-APK cold = 6,6 s after sorting the series.
- **Minimum:** Minimum JV-APK cold = 4,7 s.
- **Maximum:** Maximum JV-APK cold = 7,2 s.
- **Error count:** 0 errors in the five main cold launches; a separate network drop is not included in this series.
- **Successful launch count:** 5 successful launches out of 5 attempts; 100% success rate in this series.
- **Error type:** In a separate network episode JV-NET-01 — connection loss during the lobby, with no accepted money bet.
- **Recovery after network drop:** I turned the network on and repeated opening in 8,4 s; the history showed no duplicated bet or deposit.
- **Series comparability:** Identical actions are compared with preserved cache and a single Wi-Fi network; the times of APK, the iOS container and the desktop browser are given in separate rows.

Speed series and device compatibility

Environment / action	Five separate results, s	Average, s	Median, s	Min–max, s	Success rate
APK cold	6,6; 7,2; 6,9; 4,7; 6,2	6,32	6,6	4,7–7,2	5/5; 0 errors
APK warm	2,4; 1; 1,5; 1,5; 1,6	1,6	1,5	1–2,4	5/5; 0 errors
APK game	1,7; 3,4; 7,8; 7,2; 8	5,62	7,2	1,7–8	5/5; 0 errors
iOS WebView cold	4,1; 4,4; 2,4; 2,1; 5,2	3,64	4,1	2,1–5,2	5/5; 0 errors
iOS WebView warm	1,9; 1,7; 1,9; 2,4; 2	1,98	1,9	1,7–2,4	5/5; 0 errors
iOS WebView game	7,5; 5,7; 2,8; 1,4; 6,1	4,7	5,7	1,4–7,5	5/5; 0 errors
Desktop cold	1,7; 7,3; 6,6; 2; 5,5	4,62	5,5	1,7–7,3	5/5; 0 errors
Desktop warm	1,1; 2,3; 2,6; 2,3; 2,8	2,22	2,3	1,1–2,8	5/5; 0 errors
Desktop game	1; 7,5; 3,8; 2; 1,4	3,14	2	1–7,5	5/5; 0 errors

The sum and number of repeats refer to each row separately. Cold launch of a finished process with preserved cache, warm opening and game frame launch have different boundaries; their results are not averaged together. The main network is Wi-Fi 5 GHz; the separate 5G route is not included in this series.

Model specifications: TECNO CAMON 40 Pro 5G (https://www.tecno-mobile.com/om-en/phones/tech-specs/techspecs/camon-40-pro-5g/) — Dimensity 7300 Ultimate, 6,78-inch AMOLED, 1080×2436, 144 Hz; physical 8 GB RAM and 256 GB in the selected configuration, expanded RAM is counted separately. iPhone 16 Pro (https://support.apple.com/en-us/121031) — A18 Pro, 6,3-inch screen 2622×1206, ProMotion up to 120 Hz, selected storage 256 GB. Thunderobot 猎刃16 (https://www.thunderobot.com/item/1719) — configuration Core i7-13650HX, RTX 4060, 16 GB RAM, SSD 512 GB, 16 inches 2,5K/165 Hz and Windows 11 Home. The model specification describes the hardware, while environment versions and episode results are stored separately.

Mobile web and apps

- **Platforms according to the operator's description:** mobile site; Android **6.0+** according to the instructions, **8.0+** according to the PL and EN main pages and **8.0.0+** in the app configuration, file APK via the Android/"Zainstaluj aplikację" button or QR; iOS **12.0+**, go to the App Store via the download button or QR. The interface shows app ratings **4,8** (iOS) and **4,5** (Android). These are the operator's values. Permission to download iOS and the link are present in some of the saved responses, while in another part downloading iOS is disabled with the app enabled. Android is enabled in both configurations. On the saved iOS instruction, the name is **Zigra Wall Rush**, the notification permission caption is **Zigra Wall**. The instruction warns that the name and icon may differ. In the app configuration, a direct App Store card is saved, see the external resources section.
- **Android, steps from the saved instructions:** tap download, wait for the completion message, open the file via “Downloads”, grant installation permission to the download source, install, open, log in, optionally enable notifications. The illustration shows the Android warning about installing from an unknown source, the confirmation dialog and the “App installed” screen. In the download illustration the size **19,16 MB** is visible. The 19,16 MB illustration is separated from the approved APK 1.3.6 by a size of 7,49 MB; the label and hash are tied only to the specific binary file.
- **iOS, steps from the illustration:** go to the App Store, confirm the download, tap "Open" or the app icon, log in and choose whether to allow notifications. The images show a styled example of the interface, including the bottom menu Bonuses, WoF, Home, Tourneys and Menu, search, favorites, recently played games and a provider filter. In one English-language mockup you can see "TOP games in Germany" — **123**, "New" — **200**, a welcome example **EUR 1,000 + 150 free spins**, balance **EUR 1 397,00**. Another promo screen shows **$93 493**. These amounts and GEO relate to the illustrations, not to the money account JV-ACC-PL-01.
- **Features per the operator's description:** responsive mobile web, demo on Android, notifications about bonuses, personalized offers and events, self-update after the “Aktualizuj” command, biometrics, haptic feedback, Android Shake Bonus and Piggy Bank. Among the example games for the app are Coin Win: Hold The Spin (Gamzix), Joker Stoker and Hell Hot 100 (Endorphina), Sweet Bonanza 1000 and Book of Fallen (Pragmatic Play), Demi Gods V and Majestic Winter (Spinomenal). An example from the footer offers Piggy Bank up to **12 000 PLN per week**, the terms descriptions are given in the promo section.
- Based on the provided export, the operator's presentation of both platforms and their steps, the web interface and the saved illustrations are confirmed. The authored episodes APK 1.3.6 and iOS Webview 5.37 are described separately; the saved App Store instructions do not change the type of the verified iOS container.

Additional information from the interface and illustrations

- **Two registration steps.** On the second step EN of the form, first name, last name, date of birth, country, city and address are visible. The registration condition combines confirmation of age from 18 years with acceptance of the Privacy Policy, Bonus T&C, Terms and Conditions and Betting Rules. Consent to advertising emails and the indicator of having a promo code are highlighted separately. In the PL login form, e-mail or phone number are available paired with a password, recovery via "Nie pamiętasz hasła?" and the options Google, TikTok, X.
- **Support widget topics.** On the guest PL storefront there are six questions — how to register, log in, recover a password, start playing, withdraw funds and in which games a bonus can be wagered. Below them are the

start of a chat and the conversation history. This is a separate visible help section inside the widget. On the responsible gaming page, across different saved states, "Wypisz się z promocyjnych e-maili" and "Zapisz się na promocje e-mailowe" are shown, that is, the subscribe and unsubscribe actions are displayed. The execution of these actions has been checked and confirmed.

- **Markings in the PL footer.** Besides the verification and responsible gaming marks, the following are shown: Visa, Mastercard, Visa Secure, Skrill, Paysafecard, Neteller, Rapid Transfer, MiFinity. Visa Secure is a separate marking, and the availability of specific operations is confirmed by the cashier. The external row includes JV Partners, Polskie Sloty, Sizzling Hot Spot, GHZD ("Gry hazardowe za darmo"), Slotozilla, Bonusy Bez Depozytu, Casino Poland and SJ Slots. For the bookmaker, the caption "Sportsbook powered by Data Bet" is shown. The icons record the content of the footer, and the nature of commercial relationships is not inferred from them.
- **Counters on the mobile page.** Android is shown with a rating of 4,5, 356 062 downloads and 6 466 players online. iOS is shown with a rating of 4,8, 118 687–118 688 downloads on two screenshots and 1 620 players online. These are dynamically displayed operator figures. In the Android notification hint, Joker Stoker, a balance of €100 and the lobby "TOP games in Netherlands (the) (99)" are visible. In the promo illustration next to the lobby, the game captions Joker Stoker, BET 40, FIXED LINES 40, COIN VALUE 20.1 are used. The latter captions relate to the illustration and do not set game limits. The Android instruction contains the operator's statement about safe installation from an unknown source, and on the system dialog next to it, a warning Android about a possible risk to the phone and data is visible.

Exclusive bonuses await in the JV Casino app

Skanuj lub naciśnij kod QR, aby pobrać aplikację

Installing this app will not harm your device

Enable installs from unknown sources to make sure you don't miss any unique bonuses and personalised offers.

Benefits

Unique casino offers

Smooth and easy to use

Stay up to date with bonuses and promotions

Play more easily, win exclusive rewards

Shake to turn your phone into a rewards machine

Piggy bank: Collect rewards, break the bank

How to install the Android app

- Download the Android app.
- Tap “Download” and wait for the process to finish.
- Open the file.
- Tap “Open” to start the installation.
- Allow the app installation.
- Allow installation from unknown sources.
- Install.
- Tap “Install” and wait for the installation to finish.
- Open the app.
- Tap “Open”.
- Start playing!
- Log in and enable notifications so you don't miss any of your (personal) bonuses.

FAQ

Is using our app safe? Yes, the app is completely safe and trustworthy. Just follow the download instructions on our website.

Does JV Casino offer free play on Android? Yes, it does. You can access demo mode and play many games without risking real money.

How can I get more bonuses in the official app? Enable notifications to stay up to date with new bonus offers.

How can I keep the app up to date? The app will notify you about new updates. Just open it and tap “Update”, and the latest version will be installed automatically.

Why does the iOS version have a different design? It was created specifically for iOS devices and has unique functionalities.

The JV Casino app: A fusion of usability and security

We are committed to providing you with amazing and adventurous gaming experiences at all times. We work hard to make every gaming session convenient and fun for all players. That is why we developed the JV Casino app for Android and iOS users. This lets you enjoy our games on your smartphone wherever you are.

What's more, remember that all our casino games adapt seamlessly to different devices through our app or our mobile website, providing a smooth and enjoyable experience on both mobile devices and desktop computers. Let's take a look at what you can expect from this new development.

Promising features of the JV Casino app

Our app offers numerous features. All of them are carefully selected to particularly enhance your experience and keep you safe. Here are the main points:

Security measures: It uses biometric features to protect access to accounts. The .apk file is verified by Google Play Protect. So you don't need to worry, because it is safe to install. You can confirm these facts yourself;

Regular updates: It offers frequent updates to improve user security and introduce new features. This means there are never boring moments. In addition, it ensures that your gaming experience is always up to date and safe;

Mobile optimisation: The JV mobile app is a user-friendly app optimised for mobile screens. With a tablet or smartphone, you can easily navigate and enjoy our features;

Game types: You get access to a wide range of online games. All of them are designed to run smoothly on devices;

Exclusive bonuses: When you use it, you get access to large rewards through exclusive bonuses. In addition, we offer extra bonuses to players who subscribe to push notifications;

Push notifications: This feature provides timely updates about games, promotions, events, etc. We offer this to make sure you never miss anything;

Haptic feedback: The JV mobile app includes haptic feedback. This helps enhance your experience by offering a physical sensation to increase interaction with the software.

Remember that these features work together to provide a safe and convenient gaming experience. As a member, you are entitled to all the benefits available in our mobile app when you download it.

The process of downloading and installing the JV Casino app

You can also use the mobile version of our site if you do not want to download the app yet. However, try our apps for easier access. Our apps are available for both Android users and iOS. The JV Casino Android app version 6.0+ can be downloaded via the .apk file on our site, while the iOS 12.0+ version is available in the App Store. For a more modern option, you can scan or tap the QR code on our site to download the preferred version of the app.

The JV app for iOS

As a iOS user, the download steps are quite simple. Here is a step-by-step guide on how to do it:

Click “Install app” on this page;

Naciśnij „Pobierz”, a zostaniesz przekierowany do App Store;

Download it from there;

Open it and start using it.

Now you just need to log in to the JV Casino app on iOS with the same credentials you used in the desktop version and start enjoying various titles.

The JV app for Android

The steps for downloading our Android app are equally simple. All you need to do is strictly follow these instructions:

Click “Install app”;

Tap “Download” and wait patiently for the process to finish;

Allow your device to download the app from unknown sources. Rest assured that it is completely safe, as it has been approved by Google Play Protect;

Open the file;

Click “Install”;

Log in with your basic details and start playing your favourite games. The Android app can also be installed by scanning the QR code.

Enjoy numerous popular games in the JV Casino app

You will find many games available when using the JV Casino mobile app. Many online games have been designed with mobile play in mind. That is why they offer an engaging and enjoyable experience at your fingertips. These games are optimised for performance and ease of play on mobile devices. That is why they are very popular among players around the world. Here are some of them:

Coin Win: Hold The Spin by Gamzix;

Joker Stoker by Endorphina;

Sweet Bonanza 1000 by Pragmatic Play;

Demi Gods V by Spinomenal;

Book of Fallen by Pragmatic Play;

Majestic Winter by Spinomenal;

Hell Hot 100 by Endorphina.

These slot games offer a variety of exciting experiences. They are available to you even when you are on the move. All thanks to their mobile designs. So, enjoy!

Special promotional offers for users of the JV mobile casino

Our users can enjoy exclusive bonuses and personalised offers directly in our apps. These carefully selected promotions are tailored to your preferences, providing a satisfying and unique experience every time you visit the JV mobile app.

To make sure you never miss any of our available or upcoming offers, we have push notifications. This feature offers frequent information about special live offers, keeping you well informed and up to date. Whether it is a cash bonus, a time-limited promotion or a free spins offer, our app provides easy access to them. In addition, it ensures that you can make the most of these best opportunities to have more fun. With our exclusive and special offers, you can be sure that your gaming experience will become more satisfying and exciting.

Experience the thrill with the JV Casino mobile apps!

Our app offers exciting options for thrill-seekers. This is evident through the variety of games available, exclusive bonuses, real-time push notifications and other personalized offers. Whether you are spinning the reels of your favorite slots, placing bets at roulette, or challenging yourself in a game of blackjack, there is always something to do. That is why it offers a pleasant, smooth and engaging mobile gaming experience as you navigate.

What is more, our range of popular online games optimized for mobile play ensures that you can enjoy that excitement anywhere and at any time. So do not miss out on the special promotions. All you need to do now is download our app and unlock amazing rewards right away.

Separate details of the instructions and illustrations

iOS: "For IOS 12.0+"; "Confirm the app download. Note: the app name and icon may differ"; "Tap 'Open' in the App Store or tap the app icon on the app screen"; "Log in and enable notifications so you don't miss any of your bonuses." Name: Zigra Wall Rush. Message: "Zigra Wall" Would Like to Send You Notifications — Don't Allow / Allow.

Android: “File downloaded” (19.16 MB), “Please go to «Downloads» to install the app”; “Installing apps from this source may put your phone and data at risk”; “Do you want to install this app?”; “App installed”; “Allow JV Casino to send you notifications?”.

Details of the depicted lobby: Lobby, Favorites, Recently Played, Providers, Search; Bonuses, WoF, Home, Tourneys, Menu. "TOP games in Germany" (123), "New" (200), "Welcome bonus EUR 1,000 + 150 free spins", example balance 1 397.00 EUR; another screen "TOP games in Netherlands (the)" (99), €100 and Joker Stoker; a separate screen shows a balance of $93 493.
