Slot passport and modes

- **Configuration RTP:** Baba Yaga Tales: configuration RTP 95,0%; this is a configuration parameter, not a return JV-S01.
- **Other available RTP:** Within record 1.11.2, 95,0% is used; a change of RTP within this episode is not stated. Piggy Bankroll 92,72%/92,78% and Jewels of Ra 96,53%/96,52%/96,49% relate to other games and modes.
- **Volatility:** For comparison, Baba Yaga Tales assumes high volatility; a short session does not measure the true variance of the game.
- **Field:** 5 reels × 3 positions, 50 fixed lines.
- **Ways to win:** Line combinations from left to right starting from the leftmost reel; the highest combination on each line is paid.
- **Minimum combination:** From three identical line symbols; bonus symbols have a separate trigger condition.
- **Wild:** Wild substitutes for regular symbols; Stacked/Expanding/Shifting Wild are detailed in the rules of Baba Yaga Tales.
- **Scatter:** Three bonus symbols on reels 1, 3 and 5 award 5 or 10 FS according to the selected stage of the map.
- **Cascades:** A regular cascade is not assigned to the mechanic; Winning Symbols Re-spin keeps the winning symbols and recalculates the total of the last re-spin.
- **Bonus round:** Free Spins Journey across four stages of the map; the separate Stacked Wild Rising and Extra Wilds have their own rules.
- **Bonus purchase:** BUY is enabled, price 40× of the current total bet; at a bet of 2,50 PLN the cost is 100 PLN. In JV-S01 there were no purchases.
- **Ante mode:** A separate ante surcharge was not used in Baba Yaga Tales; ante Jewels of Ra and Golden Bet Raptor 3 are covered in their own rows.
- **Minimum bet:** 0,50 PLN in the PLN configuration Baba Yaga Tales: 50 lines×0,01 PLN; actual bet JV-S01 2,50 PLN.
- **Maximum bet:** 500 PLN in the PLN configuration: 50×10 PLN per line. When the casino bonus is active, a stricter limit of 20 PLN applies.
- **Maximum multiplier:** 1 000× of the total bet — configuration MaxWinMultiplier Baba Yaga Tales; the line payout of five Wilds has its own base bet per line.
- **Monetary win limit:** At 2,50 PLN the total configuration limit is 2 500 PLN; the observed session maximum is substantially lower and is stored separately.
- **Jackpot:** A progressive operator jackpot is not attributed to Baba Yaga Tales; JV Jackpot Hunt is a separate operator program.
- **Paytable:** I opened the paytable; for symbol 0 the values for 3/4/5 are 5/10/30 line bets. On line 0,05 PLN five symbols pay 1,50 PLN.
- **Autoplay:** Autoplay and FastPlay are available in the configuration; for JV-S01 I kept the normal speed and a fixed bet of 2,50 PLN.

Real-money gaming session

- **Mode:** Real money after cancelling the welcome; no casino bonus is active at the same time.
- **Session duration:** 17,5 minutes, 12.11.2026 10:20:00–10:37:30+01:00.
- **Number of rounds:** 126 paid rounds; 50 rounds with a payout, 76 without a payout.
- **Bet size:** 2,50 PLN in each round; total bet 50 lines×0,05 PLN.
- **Total bets:** 126×2,50=315 PLN real bets.
- **Full round payouts:** 402 PLN full payouts: one round 34,50 PLN and 49 rounds of 7,50 PLN.
- **Number of rounds with a payout:** 50 rounds with a positive payout; 50/126=39,6825% rounds in this session.
- **Number of profitable rounds:** All 50 payouts exceeded the bet 2,50 PLN; a winning round and a profitable round are separated by definition.
- **Number of bonus events:** 0 triggered FS/BUY-events in JV-S01; this does not negate the presence of bonus features in the game.
- **Maximum observed payout:** 34,50 PLN — the maximum observed payout, 13,8× of the actual bet.
- **Final balance:** 70 + 402 − 315 = 157 PLN before withdrawal JV-W01.
- **Observed return:** 402÷315×100=127,6190%; net result +87 PLN. This is the result of this particular sequence of 126 rounds.
- **Theoretical return:** 95,0% RTP assumes a long-term average; for a volume of 315 PLN the expected payout is 299,25 PLN, expected loss 15,75 PLN. It does not predict the outcome of a short session.

FEATURES

WILD substitutes for all symbols, except TOKEN symbols, ULTRA symbols, COINS, and special symbols.

Appears on reels 2, 3, 4 & 5 only.

There are three Girls above the reels: one in a Green Costume (JINXIE), another in a Red Costume (JEST), and the third in a Blue Costume (LUNA). Each attracts TOKEN symbols matching the color of her costume.

Each TOKEN symbol may randomly activate the corresponding character, triggering the FREE GAMES Bonus.

When one character is activated, they trigger a FREE GAMES Bonus with one type of special symbols (EXTRA GAMES, STICKY GAMES, or BOOST GAMES).

When multiple characters are activated at the same time, they trigger a FREE GAMES Bonus with multiple types of special symbols (MIXED GAMES).

The number of TOKEN symbols collected has no impact on the feature trigger odds.

TOKEN symbols appear in the main game only and act both as TOKEN and COIN symbols.

After a character attracts the TOKEN symbol, a copy of the symbol remains on the reels.

Each TOKEN symbol shows the prize it provides you with during the INSTANT PAY feature.

Prize values are determined by the same rules as for the COIN symbols.

Every COIN symbol shows the prize it provides you with during the INSTANT PAY feature.

The prize depends on the reel where the symbol lands and is equal to your total bet multiplied by one of the following multipliers:

- Reels 1 & 2: X0.2, X0.4, X0.6, X0.8, X1, X1.2
- Reels 3 & 4: X1.5, X2, X2.5, X3, X4, X5
- Reel 5: X10, X20, X50, X100

ULTRA symbols appear in all FREE GAMES Bonuses.

If you collect 7 ULTRA symbols during the INSTANT PAY feature, they award you with 1000X total bet ULTRA JACKPOT.

The special progress bar above the reels shows the progress of collecting ULTRA symbols needed to win the ULTRA JACKPOT.

FREE GAMES BONUS

The Girls may trigger a FREE GAMES Bonus with special symbols:

- Girl in Green Costume – FREE GAMES Bonus with EXTRA symbols
- Girl in Red Costume – FREE GAMES Bonus with STICKY symbols
- Girl in Blue Costume – FREE GAMES Bonus with BOOST symbols

Several Girls can be activated at the same time.

For example, activating the Girls in Red and Green Costumes triggers the FREE GAMES Bonus with STICKY and EXTRA symbols.

As any Bonus begins, you get 10 Free Games.

Free Games are played with the same bet as the initial game and can be won only during the main game.

During the Bonus, the highest paying symbols shown above are replaced with COINS. It happens after payouts for winning combinations (if any) and if the corresponding character is activated.

When part of a winning combination, the symbols shown above pay the same as the corresponding highest paying symbols in the paytable.

INSTANT PAY FEATURE

If at least one TOKEN symbol, ULTRA symbol, special symbol, or COIN lands on the leftmost reel, the INSTANT PAY feature is activated. During the feature, all TOKEN symbols, ULTRA symbols, special symbols, and COINS on adjacent reels, starting from the leftmost, are played.

TOKEN, COIN, and STICKY symbols pay, and EXTRA, BOOST, and ULTRA symbols are activated during this feature only.

When symbols appear on the reels at the same time, they are activated and/or pay in the following order: BOOST → TOKEN/STICKY/COIN → EXTRA/ULTRA.

SPECIAL SYMBOLS

Special symbols appear during the FREE GAMES Bonus only.

STICKY symbols appear only on reel 3 and stick to their position until the end of the Bonus.

Every STICKY symbol shows the prize it provides you with during the INSTANT PAY feature.

This prize is equal to your total bet multiplied by one of the following multipliers: X1.5, X2, X2.5, X3, X4, X5.

EXTRA symbols appear on reel 1 only.

Each EXTRA symbol awards you with +1 or +2 Free Spins during the INSTANT PAY feature.

BOOST symbols appear on reel 5 only.

A BOOST symbol multiplies the winnings from the INSTANT PAY feature by one of the following multipliers: X2, X3, X4, X5.

The multiplier applies to the current spin only: at the start of the next spin, the prizes shown on STICKY symbols (if any) revert to their initial values.

The multiplier does not apply to the number of Free Spins and ULTRA JACKPOT, if any.

3x3 Royal Piggy: Hold The Spin — Gamzix

Polish localization. The Royal Piggy rules and the general Bonus Game rules are set out in the relevant sections. Game parameters are described according to their purpose in the relevant configuration.

- The Bonus Game with an initial number of respins can be triggered in the main game by Coins on reels 1 and 3 and Royal Piggy on reel 2, or by the Heap of Coins feature.
- During the Bonus Game, only Coin symbols with a random prize from 1 to 15 times the bet, Jackpot Coins and the Royal Piggy symbol can appear.
- During the main game, the Royal Piggy symbol combined with any Coin symbol triggers the collection feature if Coins are present on only one of the reels.
- Each Coin or Royal Piggy symbol that appears on the reels during the main game gives a chance to trigger the Heap of Coins feature, which adds symbols in an amount sufficient to activate the Bonus Game.
- During the Heap of Coins feature, Coin, Royal Piggy and Jackpot Coin symbols can be added to the reels to guarantee activation of the Bonus Game.

During the main game, the graphic accumulation of Coins in the Piggy above the reels serves visual purposes only and does not affect the triggering of the feature.

The Royal Piggy symbol can appear only on the second reel, both in the main game and in the Bonus Game.

When the Royal Piggy symbol appears on the second reel during the Bonus Game, it collects all visible values of Coin symbols on the first and third reels, including Jackpot Coins, and adds them to its value.

After each collection, the Royal Piggy symbol is locked in its place, and the Coin symbols present on the reels vacate their positions.

Royal Piggy Symbol

Wild symbols substitute for all symbols except Coin, Jackpot Coin and Royal Piggy symbols.

Accompanying interface wording

The following provider lines describe the rules of the Bonus Game family. The parameters are used as designations of the corresponding values in the game configuration.

Upon reaching the upper win limit, the player receives the maximum win expressed as a multiple of the bet, and the game round ends immediately.

The maximum win in the game is defined as a multiple of the bet.

The theoretical return of this game is expressed as a percentage rate of RTP.

The return to player percentage (RTP) is determined based on analysis of gameplay data from a large number of spins. RTP may vary depending on the number of spins and the features used.

Only Coin symbols with random prizes within the range of bet multipliers defined for the given feature, Jackpot Coins and Collect symbols can appear on the reels.

Each time a Coin or Jackpot Coin symbol appears, the spin counter is reset to the initial number of respins.

The Grand Jackpot, defined as a multiple of the bet, is won when all positions are filled at the end of the Bonus Game.

The random appearance of Jackpot Coins during the Bonus Game awards the value of the corresponding Jackpot:

The Grand Jackpot win is added to the value of the symbols hit during the Bonus Game.

The Grand Jackpot, defined as a multiple of the bet, is won when all bonus positions provided for in the game layout are filled.

Major — a win defined by the bet multiplier assigned to the Major level.

Minor — a win defined by the bet multiplier assigned to the Minor level.

Mini — a win defined by the bet multiplier assigned to the Mini level.

Major, Minor and Mini Jackpot symbols are paid only in the Bonus Game.

Piggy Bankroll: The Big Stash — Penguin King

Polish game rules. The saved language pack provides the exact bonus rules. The tables after the quotations are taken from the initialization of the public demo EUR.

Win lines

All symbols pay from left to right on the specified paylines.

Wild Symbol

The Wild symbol substitutes for all other paying symbols, except the Gold Coin, the Jackpot Coin and the Piggles Family member symbols.

Prizes

Up to 12 Gold Coin symbols with prizes worth 1x, 2x, 3x, 5x, 7x or 10x can land on the reels in a single spin. When a Gold Coin symbol lands on the reels, it tosses a coin towards the Piggy Bank above the reel on which it landed. Each coin has a chance to smash the Piggy Bank and activate the Hold and Win feature. The graphic presentation of cracks on the Piggy Banks is for visual entertainment only and has no effect on the chance of activating the feature.

If the prize values are too large to display, they are displayed as bet multipliers instead.

Piggles Family Progress

There are 4 members in the Piggles Family, each with their own counter. Each spin during the base game decreases the counter of the current Piggles Family member. The next Piggles Family member level is unlocked on the next spin after their counter reaches 0. Each Piggles Family member can land on the reels only once per spin.

The levels are as follows:

- Level 1 - Unlocks Piglet Penny on the first spin. When this symbol lands on the reels during the base game, it throws 3 coins towards the Piggy Bank above the reel on which it landed and has a chance to smash the Piggy Bank and activate the Hold and Win feature. The graphic presentation of cracks on the Piggy Banks is for visual entertainment only and has no effect on the chance of activating the feature.

- Level 2 - Unlocks Piggles Jr. after 35 spins. When this symbol lands on the reels during the base game, it collects all Prizes and Jackpots that landed in the same spin.

- Level 3 - Unlocks Mrs. Piggles after 75 spins. When this symbol lands on the reels during the base game, it doubles one of the Jackpots, except the Grand Jackpot. Each Jackpot can be doubled only once. If all Jackpots are doubled, the Mrs. Piggles symbol can no longer land on the reels.

- Level 4 - Unlocks Mr. Piggles after 100 spins. When this symbol lands on the reels during the base game, it throws a jackpot coin towards the Diamond Piggy Bank above the reels. Each jackpot coin has a chance to smash the Diamond Piggy Bank and activate the Jackpot Hold and Win feature. The graphic presentation of cracks on the Diamond Piggy Bank is for visual entertainment only and has no effect on the chance of activating the feature.

Progress is saved throughout the game sessions.

Hold and Win

When the Hold and Win feature is activated, the Piggles Family member symbol covers the entire reel under each smashed Piggy Bank. The only symbols present on the reels during the Hold and Win feature are Gold Coin, Jackpot Coin, Piggles Collectors and Empty symbols.

The Hold and Win feature starts with 3 Free Spins. Each time a Gold Coin or Jackpot Coin symbol lands on the reels, the free spins are reset to 3.

During the Hold and Win feature, Prizes from all Gold Coin and Jackpot Coin symbols are collected by the Piggles Family Collectors and awarded at the end of the feature. When a Piggy Bank is smashed during the feature, after the Prizes and Jackpots on the reel under it are collected, a new Piggles Family Collector symbol is added.

If unlocked, each Piggles Family member has their own collector:

- Piglet Penny & Piggles Jr. Collector - Unlocks at Level 1.

- Mrs. Piggles - Unlocks at Level 3 and has an x2 multiplier. During the Hold and Win feature, up to 2 Mrs. Piggles collectors can be present.

- Mr. Piggles - Unlocks at Level 4 and has an x3 multiplier. During the Hold and Win feature, only 1 Mr. Piggles collector can be present.

The Grand Jackpot prize is awarded only if all 5 Piggy Banks are smashed during the same Hold and Win feature. When the Grand Jackpot prize is awarded, the feature ends.

Jackpot Hold and Win

The Jackpot Hold and Win feature works according to the same rules as the regular Hold and Win feature, except that instead of Gold Coin symbols, only Jackpot Coin symbols land on the reels.

Jackpots

There are 5 jackpots in the game. When a Jackpot Coin symbol reveals a symbol with the name of a jackpot, the corresponding jackpot prize is awarded. Up to 4 Jackpot symbols can land on the reels in a single spin. All Jackpots except the Grand Jackpot have symbols.

When the Jackpot is won during the base game, its value resets to the starting value. If the Jackpot is won during the Hold and Win feature or the Hold and Win Jackpot, its value resets at the end of the feature.

The prizes are as follows:

Mini jackpot - 15x grows to a maximum of 30x the bet

Minor jackpot - 25x grows to a maximum of 50x the bet

Major jackpot - 100x grows to a maximum of 200x the bet

Maxi jackpot - 250x grows to a maximum of 500x the bet

Grand jackpot - 5000x the bet

Chance of 3x for Hold and Win

Triple your chance to trigger the Hold and Win feature and the Hold and Win Jackpot!

Wins from all symbols pay from left to right on adjacent reels starting from the leftmost reel.

This is the WILD symbol. It substitutes for all symbols except money symbols.

The WILD symbol may have a random x2, x3 or x5 multiplier, which is applied to all winnings passing through this symbol. If more WILD symbols belong to the same winning combination, their multipliers are multiplied together.

Wins are awarded for combinations of adjacent symbols from left to right.

In total, the maximum number of possible combinations is 1024.

In the base game, the reels may randomly become synchronized. When synchronized reels stop, they display identical symbols.

These are the MONEY symbols.

On each spin, the symbol takes a random value from a predefined set. The possible values are: 1x, 2x, 3x, 4x, 5x, 6x, 8x, 9x, 10x, 12x, 15x, 20x, 25x, 50x, 100x or 200x (MINOR), 500x (MAJOR) and 2500x (MEGA) multiplied by the base bet.

If 5 MONEY symbols stop anywhere on the screen in the base game, the player wins a respin. During the respin, MONEY symbols become sticky, and the chance of the 6st MONEY symbol stopping and triggering the RESPIN feature is increased.

If 6 or more MONEY symbols stop anywhere on the screen, the RESPIN feature is triggered with 3 respins.

After the round begins, the regular reels disappear. Only MONEY symbols, COLLECT symbols and empty positions spin and stop. The round begins with the MONEY symbols that triggered the feature in the same positions.

Each time a MONEY symbol or a COLLECT symbol stops, or a collection occurs from a full screen, the number of respins is reset to 3.

During the feature, an overall multiplier is displayed above the reels. It applies to all present MONEY symbols except MINOR, MAJOR and MEGA.

This is the COLLECT symbol. It appears only during the RESPIN feature.

When a COLLECT symbol stops, it collects and awards all values of the MONEY symbols present on the screen after applying the current global multiplier.

With each collection, the global multiplier increases to the next value – from x1 through x2, x3 and x5 up to a maximum of x10.

If all 20 positions are filled with MONEY symbols, the collection occurs without the COLLECT symbol. All values of the MONEY symbols are multiplied by the current global multiplier and awarded. Then the global multiplier increases to the next value for further respins.

Special reels are in play during the feature.

The maximum win amount is limited by a cap expressed as a multiple of the bet. If the total win of the RESPIN feature reaches the feature's win multiplier cap, the round ends immediately, the win is awarded, and all remaining respins are cancelled.

The player can select the bet multiplier. Depending on the selected bet, the game may play out in different ways. The available values are:

SUPER SPIN – Bet multiplier 500x – When SUPER SPIN is active, synchronization of 2, 3, 4 or 5 reels is randomly guaranteed. When synchronized reels stop, they display identical symbols. Triggering the RESPIN feature is not possible.

ANTE BET – Bet multiplier 75x – When ANTE BET is active, the chance of naturally winning the RESPIN feature is five times higher.

Bet multiplier 25x - Normal Game

The RESPIN feature can be triggered instantly in the base game by purchasing it for 60x the current total bet.

When purchasing the RESPIN feature, 6 MONEY symbols are guaranteed to stop on the triggering spin.

High-risk games pay out wins less often but offer greater chances of achieving high wins in a shorter time

All symbols pay from left to right on the selected win variations.

All wins are multiplied by the base bet.

The base bet is the bet amount before feature-related increases.

All wins are expressed in coins.

Only the highest win per combination is paid.

Simultaneous wins are added to the total win.

The respin win is awarded to the player after the round ends.

The total respin win in history includes the total win of the cycle.

RTP in the game is 96,53%.

The return to player (RTP) in this game when using "ANTE BET" is 96,52%.

The RTP rate of the game using the "SUPER SPIN" option is 96,49%.

The return to player (RTP) in the game when "BUY RESPIN FEATURE" is used is 96,49%.

A malfunction voids all pays and plays.

Symbols forming a win disappear and new ones fall into their place, filling the empty positions. Cascades repeat as long as new clusters are formed. The entire cascade sequence constitutes one spin, and the total win is the sum of wins from all cascades.

POSITION MULTIPLIERS

Each position that is part of a win is marked. When a position becomes part of a win for the second time, it receives a 2x multiplier. Each subsequent time this position is part of a win, the multiplier is doubled – up to a maximum of 128x. The multiplier is applied to each winning cluster covering the given position. Multipliers covered by the same cluster are added together. After each spin in the base game, all positions are reset.

DARMOWE GRY

When 3 or more Scatter symbols land in a single spin, free spins are activated. Scatter symbols that land during cascades also count. 3 / 4 / 5 / 6 / 7 Scatter symbols award respectively this many free spins: 10 / 12 / 15 / 20 / 30.

Multipliers on the reels persist throughout the bonus game and do not reset between free spins. 3 / 4 / 5 / 6 / 7 Scatter symbols award respectively this many free spins: 10 / 12 / 15 / 20 / 30.

KUP BONUS

Free spins can be bought instantly for 100x total bet. Activate Extra Chance to increase the chance of activating free spins 3 times. This costs 2x total bet per spin. Extra Chance remains active until it is turned off. During this time, free spins cannot be bought directly.

Raptor 3 DoubleMax — Yggdrasil

game-specific Polish rules. Below is the help text for the game Raptor 3 DoubleMax and the saved table of the EUR demo. The heading of each separately inserted mechanic is preserved in the source.

SYMBOLS

WAYS

Payouts in the paytable change dynamically depending on the bet, evaluated from left to right. The number of ways ranges from 243 in the base game to 16 807 in the free spins bonus.

Win

No win

FUNKCJE GRY

Raptor 3 is played on a grid of 5 reels by 3 rows with 243 ways to win in the base game, evaluated from left to right. In the free spins feature, the grid can grow to 5 reels and up to 7 rows, offering up to 16 807 ways to win. The game has 4 low-paying symbols represented by card colors and 4 high-paying symbols represented by dinosaurs. There is a wild symbol that substitutes for all regular symbols and is awarded by the avalanche feature. There is a scatter symbol represented by a dinosaur egg, which triggers the free spins feature with reel expansion and last bite features during the free spins session. Each avalanche win raises the level on the DoubleMax multiplier ladder. The predator strike feature can appear on any spin in the base game and in the free spins feature and can skip or raise the level on the DoubleMax multiplier ladder.

SYMBOL WILD

The wild symbol substitutes for all low- and high-paying symbols.

The wild symbol does not substitute for the scatter symbol.

The wild symbol is not part of the reel strip. It never lands on the board from a spin and never drops as a new symbol after an avalanche.

The wild symbol is awarded only by the avalanche feature. Each avalanche win adds exactly 1 wild symbol to a randomly selected position among the positions emptied by that win.

The wild symbol appears in the base game and in the free spins feature.

SYMBOL SCATTER

The scatter symbol is represented by a dinosaur egg.

The scatter symbol has no payout of its own.

Landing 3 or more scatter symbols anywhere on the board in the base game triggers the free spins feature.

During the free spins feature, landing scatter symbols adds extra free spins and the last bite feature.

3 scatter symbols: + 1 free spin and the last bite feature is triggered.

4 scatter symbols: + 2 free spins and the last bite feature is triggered.

5 scatter symbols: + 3 free spins and the last bite feature is triggered.

AVALANCHE

All wins are paid by the avalanche feature.

When a win lands on the board, the winning symbols are removed, and at the same time the following happens:

Exactly 1 wild symbol is added to a randomly selected position among the positions emptied by the win.

The DoubleMax multiplier is raised by one level.

The remaining symbols then drop down to fill the empty positions, and new symbols drop from the top of the board to fill the rest.

The board is evaluated again. Avalanches continue as long as a new win lands on the board.

DOUBLEMAX MULTIPLIER

Each avalanche win doubles the DoubleMax multiplier, raising it by one level on the multiplier ladder.

The DoubleMax multiplier is applied to every win for which it is active.

In the base game, the DoubleMax multiplier resets to x1 when no win lands on the board.

In the free spins feature, the DoubleMax multiplier does not reset between spins. It starts at x1 and increases throughout the rest of the free spins session.

The maximum value of the DoubleMax multiplier is infinity; there is no hard limit for it.

PREDATOR STRIKE

The predator strike feature is active in the base game and in the free spins feature.

A raptor head may randomly appear from the bushes at the edge of the board when the reels start spinning. The raptor head may appear on the initial spin or an avalanche and may award one effect.

If the raptor head appears, it strikes before the board lands. It may award one of two effects or no effect. The raptor head then disappears.

If no win lands on the board, the raptor head does not appear.

There are two types of predator strike:

Claws - skip a multiplier. One randomly selected level is removed from the DoubleMax multiplier ladder. The level is selected from the current multiplier level or from any level that has not yet been reached. A level that has already been passed can never be removed. If the removed level is the current multiplier level, the multiplier immediately moves to the next level. If the removed level is an upcoming level, that level is skipped once reached.

Roar - raise the multiplier. The current DoubleMax multiplier is raised by 1 on the ladder without the need for a win. All subsequent levels on the DoubleMax multiplier ladder are calculated by adding the value to the current multiplier value (e.g. x4 becomes x5, and the next are x10, x20, x40, etc.).

FREE SPINS

Landing 3 or more scatter symbols anywhere on the board in the base game triggers the free spins feature. The number of free spins and the grid size depend on the number of scatter symbols landed:

3 scatter symbols - 5 free spins on a grid of 5 reels by 3 rows with 243 ways to win.

4 scatter symbols - 7 free spins on a grid of 5 reels by 5 rows with 3 125 ways to win.

5 scatter symbols - 9 free spins on a grid of 5 reels by 7 rows with 16 807 ways to win.

Free spins are played at the same bet as the activating spin.

The DoubleMax multiplier starts at x1 and does not reset between spins.

The predator strike feature is active during the free spins feature.

When the free spins feature ends, the total win from the free spins is added to the win from the spin that activated the feature.

LAST BITE

During the free spins feature, landing 3/4/5 scatter symbols triggers the last bite feature, which awards extra spins; all scatter symbols on the board are destroyed, which triggers an avalanche and another chance to win. This avalanche does not raise the DoubleMax multiplier and does not add a wild symbol.

Golden Bet is available in configurations where this feature is enabled.

GOLDEN BET

Golden Bet is an optional bet mode that gives the player a greater chance of a scatter symbol appearing on the board on a spin.

Golden Bet costs an additional 50% of the active bet.

Bonus buy is available in configurations with the bonus buy feature enabled.

KUP BONUS

Players can buy instant access to the free spins feature. Three bonus buy options are available.

5 free spins on a grid of 5 reels by 3 rows for 80x bet.

In configurations where RTP is visible, the return for the bonus buy is displayed.

The theoretical return to player for the bonus buy is 94,0%.

7 free spins on a grid of 5 reels by 5 rows for 240x bet.

9 free spins on a grid of 5 reels by 7 rows for 880x bet.

JAK OBLICZYĆ WYGRANE ZE SPOSOBÓW

To calculate the total win, calculate all ways wins and add them together.

A ways win is awarded when identical symbols land on adjacent reels, starting from the leftmost reel, regardless of their positions on those reels.

Each combination of positions of the same symbol on adjacent reels counts as a separate ways win.

If three or more identical symbols are set on adjacent reels, starting from the leftmost reel, find the win value in the dynamic paytable. There you can find the value for all symbols for 3 in a row, 4 in a row and 5 in a row.

The wild symbol substitutes for all regular symbols to complete a ways win. If the winning combination can be interpreted in more than one way, only the highest winning combination is paid.

All wins are multiplied by the current value of the DoubleMax multiplier.

The above does not include the scatter symbol, which has no payout of its own.

After the free spins round ends, all wins are added to the win from the game that activated the free spins.

ZWROT DLA GRACZA

RTP is displayed when the display of this information is enabled.

The expected return reflects the return from a very large number of spins by many players over an extended period of time and cannot be influenced by player strategy.

The average return to player is 94,0%.

Maximum win information is displayed when the display of this limit is enabled.

The maximum recorded win and the number of simulated rounds required to achieve it are specified in the game parameters.

The stated probability of the maximum win refers to the sum of the wins of the highest possible symbol values of all winning ways when the reels are at rest, taking into account further additional winning possibilities through other game features, such as free spins or additional bonus games.

RANDOMIZATION

The reels are spun with a fair and equal chance for each stop position by a certified random number generator.

ADDITIONAL INFORMATION

If your game is interrupted during play, you may replay the game round after restarting the game within the game-specified recovery time, expressed in hours from the interruption. After this time, any wins from the interrupted game will be added to your account. If you choose to skip the replay, your win will be added to your balance immediately.

In any situation where the replay functionality is insufficient, contact your gaming site's support team.

In the event of a game hardware/software failure, all affected bets and payouts are void, and all affected bets are returned.

The maximum win in the game is determined by a multiplier of the spin size.

The return to player percentage (RTP) is determined by analyzing gameplay data from a large number of spins. RTP may vary depending on the number of spins and the feature/features played.

Animations, graphics or user interface added to the game are for graphical and visual purposes only. They do not affect the triggering of any game features, including the bonus.

Mascot Gaming

Online machines with a progressive jackpot

Jackpot games are probably the most liked online slots both worldwide and in Poland. Players choose them mainly with the aim of hitting gigantic wins that in many cases can change their entire lives.

Such online machines are based on a very simple concept. Namely, in addition to the standard paytable and functionality, they have an additional feature. It is the progressive prize pool. This works by a small portion of every bet placed by all players playing a given title going into this pool. Depending on the type of machine itself, this may include all players of a given casino (local jackpot) or from all over the world (network jackpot). Of course, as time passes, the value of such a pool grows and grows, sometimes to gigantic proportions.

All online slots with a progressive jackpot also have a mechanism for activating such a pool, triggered fully at random. In principle, the only requirement imposed on players is the maximum bet. And that means that if you want to grab such a jackpot, always play at maximum stakes, unless the rules of a given game state otherwise.

And if luck is on your side and you activate the aforementioned jackpot payout mechanism, the entire sum accumulated in it will go directly to your casino balance. And sometimes these can be truly gigantic amounts – the two best-known online machines, namely Mega Moolah by Microgaming and Mega Fortune by NetEnt, are known for paying out amounts that, converted into zloty, amounted to even several tens of millions of zloty!

Megaways online slots

Of course, in our offer you will also find numerous online machines with the Megaways mechanic. This is an interesting solution developed and patented by the Australian company Big Time Gaming, which in simple terms consists in the game rewarding any arrangement of three or more symbols on adjacent reels in the game window. In other words, the symbols do not have to be on one specific line, all arrangements are rewarded with a prize. As a result, this type of online machine can have as many as half a million active winning lines, which naturally significantly changes the entire gameplay!

Primal Bet

Cleopatra's Gems

Mayan Riches

The Princess & Dwarfs

Greedy Greenskins.

Online slots with the Bonus Buy feature

Another interesting feature in our site's JV Casino offer are the machines with the Bonus Buy feature offered by our online casino. It is very simple and works exactly as one might assume from the name. That is, the player can buy bonuses during the game on demand and at any moment. These can be, for example, free spins or other special functions offered by a given slot.

Popular online machines with the Bonus Buy option in our offer include, among others:

Book of Aztec Bonus Buy

Curse of the Pharaoh Bonus Buy

Juicy Gems Bonus Buy

Irish Weekend Bonus Buy.

Online machines with the cluster mechanic

We also want to recommend to you other exceptionally attractive online machines from our offer. Here we mean games with the cluster mechanic. The general rule characterizing this type of game is that the game does not take into account whether the symbols are on consecutive reels, counting from the left. Instead, it focuses on identical symbols touching sides regardless of their location. That is, they can, for example, touch at the side, at the top or even on all sides. Such a group of touching identical symbols is called a cluster, hence the term "cluster mechanic".

What is worth taking into account when choosing online machines for yourself?

If you do not yet feel like a very experienced player or the available number of games in JV Casino causes you a certain feeling of being overwhelmed, then you do not have to worry – we have some tips especially for you, thanks to which you will quickly choose the optimal casino machines for yourself! What is worth paying attention to?

RTP. This is the profitability indicator for the player, choose online machines in which the RTP value is at least 96% (you will never find a game in which this indicator reaches 100%).

Volatility. Here the rule is very simple – low volatility means small wins, but falling very often, while high volatility translates into rarely falling wins, but significantly higher amounts.

Bonuses available in JV Casino. You will find numerous bonuses and promotions with us offering many different benefits. These will be deposit bonuses, free spins, special bonuses for a selected payment method, tournaments and other attractions. Choose those that best suit your preferences and the games you play!

Online machines for free and for real money – what is the difference?

In our casino you will find numerous online machines, and all of them come in two variants – free (demo) and for real money. If you have ever wondered what the difference is between them and when it is worth choosing free online slots and when for money, then we have a table for you with a set of all relevant information on this subject:

Megaways

Megaways machines in the JV Casino online offer

In leading online casinos, such as our site JV Casino, for example, Megaways slots enjoy exceptional popularity. This should come as no surprise to any fan of gambling games, as they are exceptionally attractive due to the possibilities offered by the mechanic with the aforementioned name! This solution completely removes classic active paylines, instead allowing you to collect winnings for any arrangement of identical symbols on adjacent reels – which, of course, significantly increases the player's chances of being paid out a substantial win by the online casino.

That is precisely why at JV Casino we have made every effort to prepare the most extensive range of gambling games based on this mechanic, meeting the expectations of a wide swath of our users.

But if you have never played games of this kind before, we invite you to spend a few minutes reading today's guide – you will learn from it what characterizes a typical Megaways slot and why games of this kind are so attractive to every player, both beginner and advanced!

What are Megaways slots, anyway?

Megaways is a trademark registered by the Australian company Big Time Gaming. It licenses other producers, allowing them to use its solution in their products, which is why it has spread so quickly in leading online casinos around the world, such as our Polish site JV Casino, for example.

The mechanic itself is based on a very simple concept. Previous online games in the slots group had a specific number of active paylines, that is, arrangements of identical symbols recognized by the game. They could form a predetermined shape on adjacent reels, for example horizontal, diagonal or zigzag lines, and so on. Nevertheless, their number was fairly limited and usually slots offered the player from 5 to 20 such lines. Of course, it was harder to win in that case!

But BTG developed a new solution. It departed entirely from traditional lines; instead, a typical Megaways slot can offer players up to half a million possible combinations — it is enough for identical symbols to land on adjacent reels in any positions for the game to treat that as a winning combination. In addition, games based on the Megaways mechanic have other additional features, such as a variable number of reels or symbols on the reels, but these changes are less visible.

The most important piece of information to remember before you start playing – Megaways offered by our casino means hundreds of thousands of winning symbol combinations!

Popular Megaways slots at JV Casino

Of course, in the offer of our site JV Casino you will find a great many excellent gambling games with this mechanic – we have specially selected for you the best titles from the portfolios of leading producers on the market. We particularly recommend the following productions to your attention:

Aztec Magic Megaways – if you prefer the South American jungle and Aztec treasures, then choose this slot from BGaming. Stunning graphics, interesting additional features, RTP worth 96,69% and incredible playability are its greatest advantages!

Book of Panda Megaways – a video slot that is simple at first glance, from RTP 96,95%, which nevertheless hides a wealth of special functions, such as the avalanche mechanic, multipliers, Scatters, Wilds, free spins, expanding symbols and many other attractions waiting for the player during gameplay.

All Megaways slots are characterized by incredible playability, regardless of the theme used, the subject matter or the set of additional functions. It is worth remembering this when browsing the offer of JV Casino!

Tips for playing Megaways slots

Megaways is a mechanic that gives players far more opportunities to win, which is why it is really worth choosing slots that are based on it. Although it is truly advanced, the gameplay itself does not differ all that significantly from standard slot games. Nevertheless, before starting to play it is worth getting to know the rules of the title you have chosen to make sure you understand all the issues, how the special functions work, the various additional options, the methods of calculating payouts, and so on.

However, if you do not feel up to jumping straight into the deep end, you have nothing to worry about – at JV Casino we have every Megaways slot for you also in a demo version, that is, for free. You can play it as much as you like to get to know it in practice and gain experience before you start playing for real money!

The offer of JV Casino is not only the best Megaways slots on the market! It is also plenty of other attractions thanks to which you will improve your gameplay experience. We can provide you with access to the best productions based on the licensed solution from Big Time Gaming and additionally support you with wonderful bonuses and promotions for new or regular players. Thanks to them you can obtain additional funds for playing, which will allow you to play more rounds and place higher amounts. And as is easy to guess, this can translate into higher winnings! Play with us and see for yourself!

Can I test Megaways slots at JV Casino for free before staking real money?

Yes, of course! All machines in our casino's offer are available in demo versions – both those with the Megaways mechanic and ordinary ones.

What is the difference between RTP and volatility in games with the Megaways mechanic?

RTP is a profitability indicator for the player. The closer to 100%, the better. Volatility, on the other hand, is responsible for the frequency of wins and their size (with an inverse correlation). Low volatility means low but regularly occurring wins; high volatility means high but rare wins.

Are there bonuses at JV Casino specifically for Megaways games?

It depends! Our promotions change very often, and many of them are intended precisely for titles with this very mechanic. Visit us regularly and you will certainly find a promotion that interests you.

The biggest jackpots at JV Casino – what sets these games apart

FAQ

In our offer, jackpot at JV Casino is a separate category of games where the prize pool can grow to astronomical amounts. Jackpot slots at JV Casino combine standard slot mechanics with an additional pool into which part of every stake goes – and which awaits one lucky player. If you are looking for games with a real chance of a high win, this is exactly where to start.

The mechanism is simple: every bet in a qualifying game feeds the shared jackpot pool. The more players and the higher the stakes, the faster the prize grows. In the case of the progressive jackpot at JV Casino, the pool is not set in advance – it changes in real time and can even grow several times over within a single day.

It is worth understanding the difference between the types of jackpots, because it affects strategy and expectations:

Fixed jackpot – the payout is predetermined and does not change regardless of the number of plays.

Progressive jackpot – the pool grows with every stake placed until someone wins it and the counter resets to its starting value.

Network jackpot – the pool is fed by players from many casinos at once, which means the largest possible payouts.

A progressive casino jackpot is an option for those who want to compete for really large amounts – and it is exactly these kinds of games that we have the most of at JV Casino.

Our online jackpot section at JV Casino contains dozens of titles from proven providers. Jackpot slots at JV Casino come from producers such as Endorphina, Gamzix, Pragmatic Play, Amigo Gaming, Blueprint Gaming, Penguin King, Tada Gaming, Platipus and others. Each of them has a slightly different mechanic, which makes the casino jackpot games in our offer not uniform – they differ in the number of lines, bonus mechanics and the way the jackpot is triggered.

Examples of popular titles available in our online casino jackpot category include:

Burning Hell (Endorphina) – a classic slot with a jackpot and a hold-the-reels mechanic.

Coin Win: Hold The Spin (Gamzix) – a game with a jackpot activated by collecting coins.

Jackpot Hunter (Pragmatic Play) – a dynamic slot with a multi-level jackpot.

Blazing Crown Deluxe (Amigo Gaming) – a fruit slot with symbol holding and a jackpot pool.

Jackpot Lab (Platipus) – a title with a spin-holding mechanism and a growing pool.

Fortune King Jackpot (Tada Gaming) – an Asian theme with a network jackpot.

Jungle Jackpots (Blueprint Gaming) – an adventure slot with multiple prize levels.

Diamond Raid (Amigo Gaming) – a game with a tiger jackpot and a raid mechanic.

This is only part of our offer – online jackpot slots at JV Casino are a constantly expanding category, which we regularly supplement with new titles.

The biggest jackpots at JV Casino come from progressive games fed by many players at once. Jackpots at JV Casino in this category grow regardless of the time of day – every stake in the game adds to the pool until someone wins it. After a win, the counter returns to its starting value and the whole process begins anew.

To increase your chances, it is worth remembering a few rules regarding jackpot games at JV Casino:

Check the game's terms and conditions – some jackpots require a maximum stake to qualify

Pay attention to RTP and volatility – jackpot games usually have higher volatility than standard slots

Play regularly – the progressive jackpot JV Casino has to be hit eventually, and every spin increases your chances

JV Casino jackpot is a category where the excitement is above standard – not only because a high payout is at stake, but also because the outcome can change at any moment.

How does a progressive jackpot differ from a fixed one?

A fixed jackpot has a predetermined payout value. The progressive casino jackpot grows with every wager placed – until the moment it is won. Progressive jackpots dominate our offering because they offer a chance at significantly higher payouts.

Are online jackpot slots available on a phone?

Yes. All JV Casino jackpot slots work on mobile devices – both through the browser and our app on Android and iOS. Jackpot games are fully optimised for touchscreens.

How do you win the jackpot in JV Casino?

The way the jackpot is triggered depends on the specific game. In most titles the online casino jackpot is launched randomly or through a special combination of symbols. You will find the detailed terms in each game's rules – it is worth reading them before your first play.

Is the jackpot win paid out immediately?

We process jackpot payouts according to the standard limits and processing times available in the Cashier section. For higher amounts the verification time may be longer – this is a standard security procedure used by every online jackpot casino.
