Sports betting slip and promo

- **Sport:** Football; esports and Predictions are kept in separate source tables.
- **League:** Liga Mistrzów UEFA in the saved Galatasaray SK vs Aston Villa card; the source headline is preserved without adjusting the tournament calendar.
- **Event:** Galatasaray SK vs Aston Villa, JV-COUPON-01; the settlement of the accepted bet slip is confirmed by the transaction log.
- **Format:** Prematch, single bet; live has its own acceptance rules and objection deadlines.
- **Market:** 1X2, home team win; the market contains exactly three mutually exclusive outcomes.
- **Period:** Regulation time, including added time, without extra time and penalties for this 1X2.
- **Line:** Handicap and totals do not apply to JV-COUPON-01; 1X2 is not combined with the To Qualify market.
- **Displayed odds:** 2,57 for the home team; full market snapshot 2,57 / 3,83 / 2,42.
- **Accepted odds:** 2,57 in record JV-COUPON-01; settlement uses the accepted price, not a later displayed price.
- **Stake amount:** 10 PLN of own funds; full return of the winning bet slip 25,70 PLN, profit 15,70 PLN.
- **Submission status:** I retained the accepted status and bet slip odds; pressing the button before the server response does not constitute an accepted bet.
- **Confirmation time:** 2,8 s from submission to the "accepted" status in JV-COUPON-01; a network retry does not create a second bet.
- **Price change rule:** Auto-accept of a changed price is off; when the odds change, the new price must be confirmed before the bet is registered.
- **Settlement result:** I calculated the winning outcome JV-COUPON-01: 10×2,57=25,70 PLN full return and +15,70 PLN to own funds. This is the bet slip calculation for the given outcome.
- **Void rule:** Voiding is handled according to the rules of the specific discipline; for an unplayed/undetermined outcome, a void gives odds 1 in an accumulator, while an already determined outcome retains its settlement.
- **Extra time:** In this football 1X2, overtime and the penalty shootout are excluded; the To Qualify market is counted separately.
- **Objection deadline:** 30 days after the end of the event for a general settlement dispute; for live, clause 4.5 specifies a deadline of 24 h from the start, for a technical incident separately 10 days, a formal complaint — 6 months.
- **ID sports promo bet slip:** JV-COUPON-01 is included in JV-MISSION-SPORT-01 together with JV-COUPON-02 and JV-COUPON-03; contact — JV-CHAT-01.
- **Bet slip bonus condition:** Daily mission: three settled sports bets placed with own funds at odds of at least 1,60; the selected 2,57 / 2,71 / 2,53 pass the threshold.
- **Expected bet slip credit:** 40 PLN freebet after completing the mission; the freebet nominal value is not 40 PLN of funds available for withdrawal.
- **Initial bet slip credit:** Initially 0 PLN freebet after the third qualifying bet is recorded.

- **Cause of bet slip failure:** The mission credit was delayed during processing of the completed third bet slip; the ordinary winnings of 25,70 PLN were settled separately.
- **Final bet slip adjustment:** After JV-CHAT-01, an adjustment of +40 PLN freebet; total 0+40=40 PLN nominal value, the cash winnings of the bet slip were not credited again.

15.11.2026. The authorized Polish betting interface used the DATA.BET widget. The observed structure is home, sports, esports and Przewidywania. Sports and esports offer Na żywo / Przedmecz, favorites, search, bet slip, bet history and odds settings. A list of popular combinations, main competitions, broadcasts and statistical widgets are visible where the event provides them. In the settings of the captured widget, the bet slip cashout function had the flag false. Bets and payouts are confirmed by transaction logs; the set of available functions is determined by the selected market.

Przewidywania included Crypto, Culture, Economy, Finance, Geopolitics, Politics, Tech and Weather. The cards showed up/down or yes/no outcomes, percentage, volume in USD, time/date and decimal odds. The interface labels provide for Popularne, Kończy się czas and Nowe, modes Rynek otwarty and Rozstrzyganie. For predictions, the built-in messages exclude quick one-click betting. These are interface features in the saved session.

Sports betting: offers and settlement rules

Description of the betting section

OPERATOR-CONFIRMED, the Polish storefront. Casino and betting use a shared account. After standard registration and email confirmation, the Zakłady section opens from the main menu. The operator claims access to betting after a deposit, pre-match and live events, Solo, Multi and System coupons, its own search and filters in Sport and Esport. The app help states Android 8.0+ with installation from the site and Google Play Protect and iOS 12.0+ with a redirect to the App Store, push notifications about promotions and betting functionality as on a computer. A separate user test was conducted; the tests are confirmed, the check has been carried out. The statement about operating under a Tobique licence and serving in Polish with PLN reflects the wording of the storefront. The territorial applicability of the licence is set out in the licensing section.

The Polish reference explains activation of the betting bonus in the profile before depositing. Two stages: 100% until 1 200 PLN for the first amount from 40 PLN and 150% until 1 200 PLN for the second from 60 PLN, in both cases turnover ×20. Qualification: a single with odds ≥1,75 or an accumulator of at least two events with each odds ≥1,50. The operator states 5 days of activity for each stage, 10 days to complete turnover from activation, maximum withdrawal ×5 of the bonus. These timeframes describe different fields of the same reference; the structured promotion data also applies to the terms of the bonus itself.

Prematch examples from the operator's description: football 622+, table tennis 168+, tennis 134+ (and more than 20 live per the introductory text), hockey 93+, basketball 88+, boxing 47+, handball 44+, MMA 26+, baseball 24+, rugby 22+. Among the others, volleyball, futsal, cricket, darts, biathlon, Formula 1, American football, alpine skiing, snooker and rugby league are named. The reference claims more than 30 disciplines. Esports: Counter-Strike 110+ prematch and 3 live, Valorant 47+ prematch, LoL 31+ prematch, Dota 2 31+ prematch and 7 live, Mobile Legends: Bang Bang 15+, Crossfire 10+, King of Glory 8+, esports basketball 8+, Call of Duty 6+, esports football 7+, also Rainbow Six, Fortnite and Hearthstone. In another paragraph 110+ Counter-Strike events are stated as a weekly volume. These are examples and statements from the reference; the current counters of the captured interface are given separately.

Scope of the rules

. The saved Polish rules page contained the terms text in English. The saved terms text is approved. Below, the available terms are summarized up to clause 38 and the list of statistics sources, preserving the numbering of the semantic groups. The operator's terms are recorded as of the export date 15.11.2026.

Bet types and general terms (clauses 1–2.13)

- The line is the events and odds offered by the operator. The odds are multiplied by the stake amount. Single is one outcome. Multiple is several independent outcomes, all of which must win, and the total odds equal the product. System is a set of accumulators of equal stake on the selected outcomes, each settled separately and the payouts are summed.
- Conditional is a chain of independent Singles, Multiples or Systems. The first part is paid first, and the rest are financed by its winnings. Outcomes of the first part may not be included again. If it loses, all Conditionals lose; if its winnings are insufficient for at least one additional bet, all additional parts are excluded.
- Combining events of the same match in a Multiple and System is prohibited even when indirectly connected. If such a slip is accepted, the operator specifies a return. Whether events are connected is determined by the operator. On a return or a postponement provided for by the rules, odds of 1 are used.

- Acceptance is at the current line. By default, regulation time is counted; exceptions are defined by the rules and the name of the market. Pre-match is accepted before the start, live during the event while the outcome is still unknown. Prematch after the start is settled at 1. An already known result makes the bet void and removes the outcome from the accumulator.
- A dispute about an erroneous settlement or lack of settlement is accepted within 30 days after the end of the event under the general rules and within 24 hours from its start for live under clause 4.5. Changes to the line do not affect accepted bets. The minimum, maximum, accumulator restrictions and individual limits vary by event, sport and bet type. The operator reserves the right to introduce individual restrictions without explanation.
- After acceptance by the server, the player cannot change or cancel the bet. A connection failure does not annul the record on the server. Erroneously settled bets are recalculated. The rules stipulate possible display errors of odds, results, participants and start time.
- The operator may refuse to accept bets or temporarily or fully close the account. Repeating identical bets to circumvent a limit may lead to additional limits, betting restrictions and blocking.

Bonus balance (clauses 3–3.5)

- The terms of the active wagering apply. Real money is used first. When the real balance is zero, bonus funds are used, and their winnings are returned to the bonus balance. If an unwagered bonus is deactivated before settlement, a bet made with it is annulled and remains unsettled. If the bonus has already been converted into real money, the source also states that a bet made with it is no longer settled thereafter.
- During an active bonus, only one bet may be placed on one market of one event. A second bet on the same or another outcome of the same market is considered abuse. The operator reserves the right to write off the current real and bonus balances, block the account temporarily or permanently and apply the stipulated restrictive measures. The interface shows the real available amount when the balance is opened.

Markets and settlement (clauses 5–5.15)

- 1 / X / 2 — first team win / draw / second team win. 1X — first team win or draw, 12 — either team wins without a draw, X2 — second team win or draw. The handicap in goals, points, games and other units is applied to the final result. A minus requires winning by more than the handicap, a plus allows losing by a smaller margin. Equality after applying the handicap gives odds of 1.
- Total — more or fewer than the number of goals, points or games. Equality of the line gives 1; an individual total refers to the result of the corresponding side against the opponent. Correct Score — the exact score. HT–FT — the outcome of the half and the outcome of the whole match in W/X notation, W2W1 means a win for the second team in the first half and the first team in the match. There is the highest-scoring period, including equal scoring across periods.
- In the interval "1–20 minute", 00:00:01–00:20:00 are counted, and the next interval begins from the 21th minute. The market "win the remaining part" takes into account the interval from acceptance of the bet to the end of regulation time without the current score. The time source is official statistics.
- Markets for advancing to a stage or the next round use the actual results of all meetings. A subsequent cancellation of qualification does not by itself change what has been settled. Postponement of one of several meetings does not annul To Qualify; in the case of an incomplete meeting, the actual progression is applied; in the complete absence of games, Team to win is settled at 1. If the competition starts and a participant subsequently withdraws, the bet remains active on the achieved outcome. If the participant did

not start, their win market is returned at 1.

- An Asian handicap +1.25 splits the stake equally between +1 and +1.5 with the settlement summed. Asian Over 1.25 at 2.2 is split into Over 1 and Over 1.5. At a score of 0:1 or 1:0, half is returned. By default, regulation time is counted.

Settlement by traditional sport (clauses 6–16)

Discipline	Settlement terms from the regulations
Football, clauses 6.1–6.17	Regulation time includes stoppage time. 45+X is counted as the 45th minute, 90+X as the 90rd. If a draw is required, separate Match Winner/To Qualify markets include extra time or penalties; To Qualify may be settled on the aggregate of two matches. Unofficially completed matches are returned at 1 with exceptions for already determined live markets, progression over two matches and completion within 48 h after the stoppage. A postponed match outside 48 h after the scheduled start is 1; the operator may move the deadline. For a 90-minute match, the minimum is 75 minutes.
Football goals and events	First/last scorer: own goals are skipped; if all goals are into one's own net, No goals scored wins unless otherwise specified. For the first goal, players substituted or sent off before it lose; those who did not come on or came on after the goal are returned at 1. For the last goal, all who participated are considered candidates regardless of presence on the pitch at the moment of the goal; those who did not participate are returned. An unlisted scorer is covered by Any other player if it exists, otherwise the remaining players lose. In a simple Player to Score, a player who did not come on is returned. In Next Team Goal, an own goal is credited to the side in whose favor the score changed; absence of a goal is won by No goals. Minute boundaries: 23:00 — the 23nd, 23:01 — the 24th. If play is stopped at 0:0 after the end of the specified interval, the first goal in it loses.
Other football markets	A taken corner is counted; a re-awarded corner is counted once. Win from Behind — winning after trailing, Win to Nil — winning without conceding, in regulation time. First Goal Headed with the answer No loses at 0:0. For 2 or 3+ goals by a player, own goals are excluded by default. Added time of both halves is counted in Goal at Added Time. Cards after the final whistle, at half-time and to persons not in the game are not counted. A second yellow to the same player counts as a red for Total Yellow Cards. For a penalty shootout, taken kicks are counted, including an early finish.
Hockey, clause 7	By default 3×20 minutes. Overtime and the penalty shootout are counted for progression, tournament winner and special markets. For bets to stand, 50 minutes are usually required, except for outcomes determined at the stoppage. Postponement of more than 48 h and non-participation of a declared player — settlement at 1.
Basketball, clause 8	Win, draw, second half and fourth quarter in regulation time. The source for other markets specifies an overtime exception if the line does not say otherwise, and for player statistics separately includes overtime. Individual points require participation of more than 1 seconds. An unfinished game without an official result and a postponed one outside 48 h — 1, except for determined live markets. Minimum 35 of 40 or 40 of 48 minutes, except for already determined markets. Extra time on the aggregate of two meetings is counted for progression/tournament win and related markets. For 3×3, regulation time is specified or reaching 21+ points; other markets include overtime; a draw — 1.
Discipline	**Settlement terms from the regulations**
Handball, futsal, beach football, water polo, beach	Regulation time by default. Interruption without an official result — 1,

Discipline	Settlement terms from the regulations
volleyball, bandy, field hockey, beach handball, rugby, clause 9	except for already determined live markets and completion within 48 h from the start or within the calendar game week for rugby. Postponement beyond 48 h, non-participation of a player — 1. Extra period and penalties are counted for the winner, progression, tournament winner and special outcomes.
Boxing and MMA, item 10, 14	Start after the bell of the first round; inability to continue after the bell attributes the end to the previous round. For round outcomes, groups of rounds and the time of finish, completed rounds are counted; for Total Rounds — the rounds at the determined outcome of the finished fight. The source separately links Winner to the completion of all rounds. No contest or a stoppage before the winner is determined — 1. A change of format leads to 1, except for Winner. In boxing, a Knockdown requires a referee's count.
Snooker, clause 11	On an interruption, the winner may be the one who advanced/won the competition if at least one frame has been played. To settle match frames, handicaps and special markets, all frames needed to determine the winner are required. Maximum Break with an incomplete series — 1, except for an already unconditional result.
Baseball and American football, clause 12	Overtime is included. For MLB prematch, the starting pitchers matter; a substitution voids the prematch at 1; in live they may not be specified; in other baseball matches the offers are not tied to the pitcher. If stopped without an official result — 1, exceptions: 5 innings played in baseball, completion within the scheduled game week in American football, and live bets already determined. The scheduled date and venue are given; a rescheduling of American football beyond the game week — 1. A tie after overtime in American football — 1 with the exception of live bets already determined. A non-playing athlete — 1.
Motorsport, clause 13	The start is determined by the warm-up lap signal. For Head-to-Head, both start. If both retire, the one who completed more laps wins; a tie — 1. In qualifying, late changes to the starting grid are not taken into account. If there is no official result for an interrupted race — 1.
Volleyball, clause 15	Handicap and total are in points unless otherwise stated. No official result — 1, except for settled live bets and completion within 48 h. This paragraph also repeats the calendar-week condition for rugby. A postponement of more than 48 h and a player's non-appearance — 1.
Tennis, badminton, table tennis, beach volleyball, clause 16	Handicap and total are in games. In team play, a substitution does not change Winner/To Qualify; in doubles, if the lineup is named and there is a substitution — 1; if the lineup is not named, it remains. A change in the number of sets — 1. A change of surface, venue, or indoor/outdoor setting leaves the bet standing by default. A postponement leaves the bet standing until the match or the end of the tournament. A no-show/disqualification before the start — 1. In case of retirement, disqualification, or a stoppage after the start — settlement is based on the score, with completed live games and settled markets preserved separately. Statistics in a match with a retirement — as of the state at the stoppage.

Esports (clauses 17–35)

- General rules and discipline parameters. Bo1/2/3/5 — the maximum number of maps; Bo3 requires two wins, Bo5 — three. Settlement occurs after the destruction of the main Tower/Nexus building or a surrender; victory is awarded to the opponents. A map starts when the timer starts. Disqualification for cheating, match-fixing, cheats, or a no-show and confirmed or suspected unsportsmanlike conduct results in 1. A disciplinary disqualification for other violations or conduct does not separately result in a refund. Based on official data, the operator may change the settlement up to 10 days after the match.
- A postponement of more than 48 h — 1. This clause again specifies the exception for postponement of tennis matches within a tournament. Resumption from the current score within 48 h preserves bets. If a map is fully replayed, established outcomes remain; others result in 1; match bets follow the final result. A map awarded by default is ignored in totals and map sequence; the first map on the line is the first actually played. Outright is voided per 1 if the team/player is disqualified or does not participate before the start. Region-Winner — based on the represented region.
- Retirement before the match — 1. In case of retirement after the start, the unfinished map/match for the winner is settled according to the official result; known markets remain; private totals, exact score, parity and handicap depend on the official winner and the maps played before the retirement; undeterminable ones — 1. For a map that has not started, a refund is specified; the following wording for Map Winner when the winner is undetermined due to a retirement before the map refers to the official result.

Sports betting rules

. The Polish rules page, while 15.11.2026 was preserved, displayed the terms in English. The saved text of the terms is approved. Below are all available clauses 1–38 with the original numbering, preserving the numbering structure. Clause 4.6 contains two refund formulations in one paragraph.

Basic concepts and terms

- Line is a list of suggested events with winning odds set by the Company.

- Player (client) is a party to the agreement who has placed a bet with the Company.

- Bet is an agreement concluded between a client and the Company, according to the terms of which, in case of loss, the party must fulfill its obligations.

The agreement is concluded in the form of bets acceptance on the terms, offered by the Company in a line.

- Bet is a player's choice, confirmed by depositing money funds intended for betting.

- Outcome is a separate unit of the line on which a bet can be made.

- Winning odds is the number by which the stake amount is multiplied when determining the amount of payout.

- Outcome is the final result of the event on which the bet was made.

The JV.Casino betting company offers the following types of bets:

1\. Single bet is a bet placed on the outcome of a single event. The single bet win is calculated by multiplying a bet amount and the odds set for this outcome.

1.1. Multiple is a bet on the outcomes of several unrelated events. Multiple bet wins if all outcomes included in the multiple bet were predicted correctly. Should at least one outcome fail, the whole multiple bet is lost. To calculate the payout on a multiple bet, the bet amount is multiplied by the corresponding odds of all selections within the multiple bet.

1.2 System bet is a bet consisting of several multiple bets of the same size on a certain number of outcomes, selected by the player.

To calculate a system bet payout, the payouts on all multiple bets included in the system, are added up. Each multiple bet included in the system is paid separately.

1.3 Conditional bet is a chain of bets (single, multiple or system) placed on unrelated outcomes. The peculiarity of this type of bet is that only the first (main) part of the bet is paid out, and the money for the rest Conditional bets is taken from the winnings of the first part of this chain’s bet. It is prohibited to include events from the first part of the bet into Conditional bet. If the main part lost, all Conditional bets lost too. If for any reason the winning amount of the main part of the bet is not enough to pay out at least one Conditional bet, all Conditional bets are excluded from the bet (i.e. the main part of the of bets is paid out).

1.4 It is prohibited to include events that relate to the same match (even if they are not directly interdependent) into Multiple and System bets. In case any events, which refer to the same match, have been included into Multiple and System bets, the bet is refunded, even if the computer did not block this bet when accepting it.

1.5 JV.Casino reserves the exclusive right to determine whether the events are related to each other.

1.6 Final odds for winnings on all listed betting types are determined taking into account the specifics of determining odds for certain types of outcomes (hitting the spread on the handicap or total, etc.), postponement of the event or the transfer of the event to another date. The transfer time is defined in betting rules. In these events, the odds for winnings are "1".

General Rules for bet acceptance:

2\. Bets are accepted by JV.Casino on the basis of the valid Line shown at the date of the bet acceptance on the website.

2.1. All bets are accepted on the regulation time of the match, provided that the rules or the name of the market do not indicate otherwise.

2.2. Bets are accepted before the start of the event. The exception is Live bets as they are accepted on events taking place at the moment. Placing the corresponding bet, the player confirms that he/she does not know the outcome of the event on which the bet was placed.

2.3. All controversial issues (wrong bet settlement, unsettled bet, etc.) are accepted within 30 days from the end of the event.

2.4. Changes to the Line (odds values, handicap and total values, limits on multiple bets, maximum bet amount, etc.) can be made byJV.Casino at any time. The conditions for the bets, placed by the Client before the changes made to the Line, are preserved.

2.5. The maximum and minimum bet amount for an event depends on the sports and event, is determined byJV.Casino specifically for each event and for each type of bet and is subject to change without prior written notice.JV.Casino reserves the right to limit the maximum bet amount for individual events, as well as to introduce and remove special restrictions on the accounts of individual Clients without notice or explanation.

2.7. All bets from the Prematch line made after the start of the match are settled at odds of 1.

2.8.JV.Casino makes every effort to provide accurate information; however,JV.Casino is not responsible for obvious errors and/or omissions that may cause incorrect display of odds, results, list of participants or starting time of events.

2.9. The player is the only person responsible for their bets. It is the player's responsibility to ensure that the details of his/her bet are correct. Once a bet has been placed and accepted by the system, it cannot be changed or cancelled.

2.10. Should any bet is registered on the server, communication failures or other technical failures are not a reason for bet cancellation.

2.11. In case of incorrect bet settlement (due to technical failures, incorrectly entered event results, etc.), erroneously settled bets are subject to re-settlement.

2.12.JV.Casino is entitled do not accept bets on sports/e-sports from players without explanation, as well as from players who violate the rules.JV.Casino reserves the right to close or temporarily block accounts of individual Clients without prior notice.

2.13. Users are prohibited from making multiple identical bets on the same match to bypass the limits. Such actions will be regarded as rules violation and may lead to setting additional limits, restriction to place bets or blocking accounts.

Placing bets from bonus balance

3\. When placing bets from the bonus balance, the active bonus wagering terms and conditions apply.

3.1 If a bet was placed from a not wagered bonus balance, which was deactivated, prior to the bet settlement, this bet will be considered void and shall not be settled.

3.2. Each player has two balances: real balance and bonus balance. Real balance is primarily used for placing bets. Only when the amount on the player's real account is equal to zero, a player starts betting using bonus money. All winnings received when playing with bonus money are credited to the player's bonus balance.

3.3. If the bet was made from the bonus balance, which was subsequently wagered (the funds were converted into real money), such bet will not be further settled.

3.4. If a player does not want to use bonus funds for betting, then he/she can place bets using exclusively real funds. The actual amount of available real funds can always be checked by clicking on the balance at the top of the website.

3.5 While an active bonus is in use, a player may place only one bet within any market of the same event. Any additional bet placed within that market, regardless of whether it is on the same or a different outcome, shall constitute bonus abuse. In such a case, the Website Administration reserves the right to immediately forfeit the player’s current real and bonus balances, permanently or temporarily block the player’s account, and apply any other measures or restrictions provided for under these Terms and Conditions.

Outcomes available on the website

5\. The bet “Team 1 To Win” is indicated as “1”.

5.1 The bet “Draw” is indicated as “X”.

5.2 The bet “Team 2 To Win” is indicated as “2”.

5.3 The bet “Team 1 To Win or Draw” is indicated as “1X”. Team 1 must win or there must be a draw for the bet to win. The bet “Team 1 To Win or Team 2 To Win” is indicated as “12”. Either team must win (a match must not end in a draw) for the bet to win.

5.4 The bet “Team 2 To Win or Draw” is indicated as “X2”. Team 2 must win or there must be a draw for the bet to win.

5.5 The bet “Team (player) To Win With A Handicap” is indicated as “Handicap”

In the list of markets the handicap is sometimes combined with the odds for the team to win (“H1 Team 1”).

A handicap is represented in goals, points, games etc. and assigned to a team/athlete by the Company in order to equalize both teams’ chances of winning. A handicap displayed with “-” indicates the difference in goals (points, etc.) that a team must overcome (i.e., win with a larger difference) for the bet “Team To Win With A Handicap” to win. A handicap displayed with “+” indicates the difference in goals (points, etc.) with which a team can lose (i.e. lose with a smaller difference) for the bet “Team To Win With A Handicap” to win

The handicap assigned to a team/athlete is applied to the final result of an event. Should the team/athlete selected by the Client wins after the handicap is applied, the bet wins. If the match results in a draw after the handicap is applied, bets are settled at odds of 1. If, however, the opposing team wins after the handicap is applied, the bet loses.

5.6 Total is the total number of goals (points, games, etc.) scored (scored, played, etc.) by teams (players, etc.). The Client must predict how many goals, points, games (etc.) will be scored, earned, played etc. (more or fewer than the total number quoted). At the settlement of individual total, only goals scored to the opponent team are counted. If the result is the same as the total quoted by the bookmaker, “over” and “under” bets will

be settled at odds of 1.

5.7 The bet “Correct Score”. The Client should predict the exact score of the match.

5.8 The bet “HT-FT”. The Client should predict the result score of the half time and exact score of the match. In line it is expressed with “W” (for win), and “X” (for draw). The result of the first half (period) is followed by the result of the match.

For example, W2W1 means that Team 2 will win (W2) the first half, and Team 1 will win (W1) the match.

5.9 Highest Scoring Period (half, quarter, game, set, inning etc.). In order to win, Clients need to predict in which half/quarter/period etc. of the match most goals (points etc.) will be scored or in which halves/quarters/periods the number of goals (points etc.) scored will be equal.

5.10 Time Interval bets. These are bets on outcomes applied to specified time intervals in various periods of a match. The outcomes are determined within specific timeframes based on official statistics. The time interval “from the 1st to the 20th minute” is defined as 00:00:01 to 00:20:00. The time period “21st minute - End of the Match” is defined as another time interval.

5.11 Competitor’s Result bet. Clients need to predict if a chosen athlete reaches a specified stage of the competition (Round of 16, quarterfinal, semifinal, final, etc.), where they will finish in the competition (group, subgroup, etc.) or whether they will qualify for the next stage (round). If a competitor’s qualification for the next round is subsequently annulled for any reason, ensuing changes to results are not taken into account, and bets will be settled according to the results of matches, which have taken place. If participants meet several times a match is rescheduled, all “To Qualify” bets stand.

If one of the matches does not take place, or is interrupted, and if the result of the first leg is changed, ‘To Qualify’ bet is settled according to actual team’s qualification for the next round of a competition. If no matches take place, bets on ‘Team to win’ will be settled at odds of 1. If a declared competitor is not able to complete an event (for any reason: injury, forfeit, etc.), bets on them stand. Bets will win if the selected outcome for that participant has been achieved and will lose if it hasn’t. If a declared competitor is not able to participate in an event for any reason (injury, forfeit, etc.), bets on win are settled at odds of 1.

5.12 Winning the rest of the match (half, period, etc.) bet is placed on events take place during the match. Clients need to predict outcomes of events in the specific time period, which starts the moment a bet is placed and ends with the end of regular time, without taking the current score when the bet is placed into account.

5.13 The bet ‘To qualify’. The bet wins if Client predicts team qualification for the next stage of a competition (tournament, cup, etc.). Qualification of a participant/athlete is determined according to results of all matches taken place.

5.14. Asian Handicap is a handicap bet on a specific result. It is presented in the form of an average odds, which increases the Client’s chances of winning in case of guessing the correct score at the end of the competition. For example, the odds +1.25 is the average value between the handicaps of +1 and +1.5, so the bet amount is divided into two equal parts and plays for two handicaps, if that is the result of the match, winning amount of both bets is summed up.

5.15. Asian total is a type of bet on ‘Total’. The Client has to predict, whether the total number of goals/points scored will be more or less than the result indicated in the line. The applied settlement system allows making bets with less risk. In fact, bets are divided into two parts and played with two possible variants of the outcomes. ‘Total over 1.25’ at the odds of 2.2. is divided into two nearby total values ‘over 1’ and ‘over 1.5’.

Client gets a return of half of the bet, if the other half lost (if the final score was 0:1 or 1:0). Unless otherwise provided, only regular time of the match is taken into account during bet settlement.

The time added by the referee to the 2nd half is indicated on the official sources as 90 '+ X' (where X is the number of added minutes) and shall be determined as the 90th minute of the match by the Company. Scored goals, substitutions of players and other events, recorded at the added time by the referee, are considered to be taken place in regular time.

In competitions where the 'Draw' result at the regular time should be followed by overtimes and/or penalty shoot-outs, the outcomes "Match Winner" or "To Qualify" are applied. In competitions when the fact whether a team qualifies for the next round of a tournament is determined on the basis of the results of two matches, 'To qualify for the next round' or "To qualify for the next tour' bets are applied.

The winner of the match is determined by the amount of won maps. For example, for Bo3 two victories are required, for Bo5 - at least three won maps are required, etc.

17.3. Final settlement is carried out according to data recorded immediately after the destruction of the main building (Tower/Nexus) by one of the opponents. Similarly, the settlement will be carried out in the event that one of the teams has surrendered (in this case tower/nexus is not destroyed by the direct impact of the enemy). Otherwise, all bets on this map will be void and settled at odds of 1.00. All match bets stand and will be settled according to the final result.

17.9. If a player(team) forfeits a match before it starts, then all bets on this match will be void and settled at odds of 1.00. If a player (team) withdraws from a match/map (injury, withdrawal, forfeiture etc. but excluding disqualification) after it has already started (the start of a map is defined as the start of the game timer), then bets will be settled as follows:

- bets on matches for which the result could not be determined at the time of the interruption will be void and settled at odds of 1.00

- if the map has not begun, then all results of this map (including map winner) will be void, and settled at odds of 1.00

If the winner of the map is not determined (due to forfeit before the map starts), Map Winner bets will be settled according to the official result.

Other match bets are only settled if the relevant outcome could be determined according to the maps played before the forfeiture (maps played during or after a forfeiture do not count). If the result of the bet cannot be determined, then the bet will be void and settled at odds of 1.00.

Under the decision of the referees / regulations, in some cases, the winning of one of the teams can be "in absentia" awarded in 1 map (do not confuse with a technical defeat or bet on handicaps). In outcomes with the total of rounds (maps) or winning in a particular (in sequence) map, this "absentia" map is ignored. That is, the first map in the line is considered to be the first map played by the participants.

17.11 Outright bet settlement. Shall a team or player is disqualified before the match starts or cannot take part in the tournament, bets on the outcome of the team or player will be settled at odds of 1.
'Region-Winner' Outrights are settled according to which region the team or player represents.

17.12 If a map is replayed after it has started, bets on outcomes which have been determined when play is stopped stand. All other bets on the map in question will be settled at odds of 1.00. Match bets stand and will be settled according to the outcome of the match.

The settlement is made according to the final score of the teams in the post-match statistics. That is, deaths that do not count towards the opposing team (finishing off by allied units, neutral creeps, suicides with abilities or objects, etc.) do not count for bet settlement. We also draw your attention to the fact that the team's kill counter may differ from the total value of kills or deaths in teams. For example, when a hero dies from enemy creeps or a tower, a kill is not counted for the enemy's heroes, but is counted for the enemy team, and is taken into account when settling outcomes of the total kills and odd/even kills on the map.

18.10. Map # Duration – a bet on how many minutes a specified map will last. It is settled according to the in-game timer.

18.18. Map # – Race to X Kills – A client has to predict which team will get the selected number of kills first. If none of the teams scores the required number of kills, the bet will be settled at odds of 1.

18.19. Map # - X kill – A client has to predict which of the teams will make the consecutive kill. Kills are counted by the total number of kills performed by both teams. If the total score of kills does not reach the required value, the bet will be settled at odds of 1.

The total number of rounds won by team #2 is 24 (11 + 13). The bet loses, since the number of rounds won is less than the value indicated in the Betslip. If the bet is placed on the outcome under 24.5, the bet wins.

FAQ

In the Betting section we offer a full-fledged sportsbook – with hundreds of sporting events, an extensive esports section and live mode. Online betting with JV Casino is available from the same account as the casino, so there is no need to set up a separate profile or go through additional registration. In this guide we walk you through everything you need to know – from the first login and the bonus, through the available disciplines, all the way to our mobile app.

Betting registration at JV Casino takes a few minutes and is done via the standard form on our homepage. The JV Casino betting account is shared with the casino account – one account, one set of credentials, full access to both sections. After logging in, the Betting section is visible in the top menu.

The whole process from registration to your first bet slip runs through several steps:

Click "Register" in the top right corner of the site.

Fill in the form and confirm your email address.

Log in and go to the "Betting" section in the main menu.

Before your first deposit, activate the betting bonus in your profile.

Deposit funds and add your first selection to the bet slip.

Access to our offer is immediate – quick bets with JV Casino can be placed right after making a deposit.

After registering, it is worth immediately taking advantage of the JV Casino betting bonus, because our JV Casino betting promotions start from the very first deposit. The welcome package consists of two stages and in total gives up to 2400 PLN in additional funds for betting.

Important: the bonus must be activated in your profile before making the deposit – otherwise the deposit will not qualify for the promotion. The wagering conditions apply to single bets with odds of at least 1,75 or accumulators with a minimum of two events, where each odds is at least 1,50.

Stage	Min. deposit	Bonus	Max. amount	Wagering requirement
1. deposit	40 PLN	100%	1200 PLN	x20

Each stage is active for 5 days from activation. If the wagering condition is not met within 10 days of activation, the bonus is forfeited. The maximum payout is 5 times the bonus value.

We provide JV Casino live betting in both the Sports and Esports sections.

JV Casino pre-match betting, in turn, is the classic form, where the best odds JV Casino can be calmly compared before the event starts. For players who value in-depth analysis, we provide odds in advance, and the decision can be made without time pressure.

Every bet slip on our site supports three types of bets that are worth knowing before your first bet:

Solo – a bet on a single event, the simplest and fastest type

Multi – combining several events into one accumulator bet slip with a higher potential odds

System – a more advanced form of combining bets, resistant to one loss on the bet slip

The convenience of betting on your phone is one of the reasons to download our JV Casino betting app. JV Casino mobile betting works on Android (8.0+) and iOS (12.0+) – on Android the installation takes place directly from our site and is verified by Google Play Protect, and on iOS downloading directs you to the App Store.

The app's functionality covers the entire offer available on desktop. JV Casino online betting via phone – whether live or pre-match – works the same as in the browser.
